"Functional Literacy"

How did you use your literacy today?
"Functional literacy" defined in UNESCO report of 1956: “A person is functionally literate when he has acquired the knowledge and skills in reading and writing which enable him to engage in all those activities in which literacy is normally assumed in his culture or group”

Difficulties in measuring functional literacy

In US, “functionally illiterate” rapidly becomes a loose way of saying “virtually illiterate”

47.5% of the nation - almost 1 of 2 Americans are functionally illiterate!– Web site of Literacy Now!, Inc.

Dorothy Allison's autobiographical novels and social commentary slices wide the underbelly of Southern female experience–growing up dirt poor and shamed, functionally illiterate in the language of love. Chicago Tribune

Literacy and Education

Education should be a vehicle for producing literate society per societal requirements…
But often fails to achieve these goals for historical, symbolic, class reasons
"Perhaps [the teaching of orthography] is best done by Pairing the Scholars, two of those nearest equal in their Spelling to be put together; let these strive for victory each propounding ten words each day for the other to be spelt. He that spells truly most of the other's Words; he that is Victor most Days in a Month, to btain a prize, a pretty neat Book of some Kind useful in their future Studies."

B. Franklin, 1751
The Spelling Bee: the oral culture of literacy

Popularity of the spelling bee:
"Thar's a new game down in Frisco, that ez far ez I can see
Beats euchre, poker, and van-toon, they calls the "Spellin' Bee."
…O little kids, my pretty kids, down on your knees and pray!
You’ve got your eddication in a peaceful sort of way;
And bear in mind thar may be sharps ez slings their spellin’ square,
But likewise slings their bowie-knives without a thought or care.
You wants to know the rest, my dears? Thet’s all! In me you see
The only gent that lived to tell about the Spellin’ Bee!"

--Bret Harte, "The Spelling Bee at Angels"

1875: 4000 attend spelling bee at the Academy of Music in Philadelphia.
"Spelling was my forte, as is natural for a child of tenacious memory and no judgment." Horace Greeley, of his childhood around 1820

Winning words from Scripps National Spelling Bee in decade following 1925: promiscuous, intelligible, fracas, gladiolus, knack.

Winning words in recent Bees: xanthosis, vivisepulture, euonym, opsimath, succedaneum, and prospicience.
Literacy, power & social control
Against Literacy

Literacy as an instrument of increased political consciousness, which can instill "dangerous ideas"

[It is not easy] to conceive or invent anything more destructive to the interests and very foundation principles of a nation entirely dependent on its trade and manufactures than this giving an education to children of lower class of her people that will make them contemn those drudgeries for which they were born. 1763.

Too much education "would make everyone unfit to follow the plough." Bishop Samuel Wilberforce, 1857

BUT:

“We must build more schools or more prisons.” Edinburgh Review, 1839
Literacy as an instrument of "moral improvement" and social control

But literacy also regarded as instrument of social control, which guarantees political stability and workers' tractability.

"The more [the poor] are instructed, the less liable they are to the delusions of enthusiasm and superstition, which, among the ignorant nations, frequently occasion the most dreadful disorders." Adam Smith

"The learning we are to communicate is only intended to enable you to read the scriptures and to see that it is the will of God that you should be contented with your station." Sunday School Tract, 1806
"Those who have been accustomed to exercise their minds by reading and studying... have greater docility and quickness in applying themselves to work [and] greater appetite, dexterity or ingenuity in comprehending ordinary processes." Horace Mann, 1849.
Emphasis on Moral Advantages of Literacy Instruction
"Reading will help to mend people's morals, but writing is not necessary." Jonas Hanway, ca 1780

"It is not proposed that the children of the poor be taught to write and cipher." Anglican National Society for Fostering Education.

“Reading is a key to the treasures of the holy writ… but writing and arithmetic should be reserved for particular children.” Rev Vaughan Thomas 1812
"Perhaps [the teaching of orthography] is best done by Pairing the Scholars, two of those nearest equal in their Spelling to be put together; let these strive for victory each propounding ten words each day for the other to be spelt. He that spells truly most of the other's Words; he that is Victor most Days in a Month, to btain a prize, a pretty neat Book of some Kind useful in their future Studies."

Literacy as a subversive force
Literacy as a subversive force

Conflicting views of literacy:

Literacy as an instrument of increased political consciousness, which can instill "dangerous ideas"

"Educate first, agitate afterwards. Ignorance, superstition, and timidity [timorousness] are the weapons which our oppressors have used most effectively in the past. -- *Palladium of Labor*, 1873

Cf Paulo Freire on literacy as the “pedagogy of the oppressed” and a means for disrupting the “culture of silence.”
Seditious Uses of Literacy in the past

Rise of the Radical Press

William Cobbett's *Political Register* in Britain achieves 44,000 weekly circulation in 1816 (as pamphlet, to avoid 4d. newspaper tax).

1819: Richard Carlile's *Republican* achieves greater circulation than the *Times* after Carlile is imprisoned for sedition.

"Group" Literacy and Political Consciousness

Cf lectores in Cuban cigar factories:

Followed creation of cigar-makers' union in 1857; lector paid for by workers (85% illiteracy rate in Cuba at the time)

1866: Political Governor of Cuba issues edict making it illegal "to distract the workers of the tobacco shows... with the reading of books and newspapers, or with discussions foreign to the work in which they are engaged."
Literacy and Black Americans

Following rebellions of Denmark Vesey (Charleston, S. Carolina, 1822) and Nat Turner (Virginia, 1831), many southern states make it illegal to teach blacks to read & write.
The "dangers" of black literacy

Very soon after I went to live with Mr. and Mrs. Auld [ca. 1830], she very kindly commenced to teach me the A, B, C. After I had learned this, she assisted me in learning to spell words of three or four letters. Just at this point of my progress, Mr. Auld found out what was going on, and at once forbade Mrs. Auld to instruct me further, telling her, among other things, that it was unlawful, as well as unsafe, to teach a slave to read…Narrative of the Life of Frederick Douglass, An American Slave, 1845
The "dangers" of black literacy

"If you give a n___ an inch, he will take an ell. A n___ should know nothing but to obey his master—to do as he is told to do. Learning would spoil the best n___ in the world. Now," said he, "if you teach that n___ (speaking of myself) how to read, there would be no keeping him. It would forever unfit him to be a slave."

_Narrative of the Life of Frederick Douglass, An American Slave, 1845_
"These words sank deep into my heart, stirred up sentiments within that lay slumbering, and called into existence an entirely new train of thought. …I now understood what had been to me a most perplexing difficulty—to wit, the white man's power to enslave the black man. It was a grand achievement, and I prized it highly. From that moment, I understood the pathway from slavery to freedom."

*Narrative of the Life of Frederick Douglass, An American Slave, 1845*
The growth of new wants, presided over by intelligence and culture, is the best lever for raising the status of the idle, quarreling, sensual, ravishing Afro-American. Certainly the infecting of the backward portion of the race with a high estimate of cleanliness, neatness, family privacy, domestic comfort, and literacy is an agent quite as moralizing as the dread of future punishments or the love of an ethical God.

Edward Alsworth Ross in the *Am. Jnl. Of Sociology*, 1898

Not a universal view…
The achievement of black literacy

Rise in black literacy after Civil War: from 5-10% to ca. 50% by 1900

Literacy as a "coveted possession"

With the children that are coming up no white men will not be needed. They are learning to read and write. Some are learning lawyer, some are learning doctor and some learn minister, and reading books and newspapers they can understand the law. Beaufort, S.C.
Literacy as "a good in itself"
Literacy as "a good in itself"

2d half of 19th century
- Introduction of compulsory universal schooling
- Increase in immigration, urban in-migration
- Introduction of women into the workforce
  - Women in bus. schools from 4% in 1871 to 77% in 1900
- Rise of both radical politics and of political parties and "boss" system makes both conservatives and reformers eager to create literate public.
- Literacy rates become an indicator of modernity.
Literacy as a public good

The presuppositions of "literacy"

Invention of the word literacy (US, ca 1880)

A public good

A matter of general civic interest & state responsibility

Implies a basic or minimal (and presumably measurable) level of knowledge or competence.

(Contrast "We should require a minimal literacy in/knowledge of history.") Suggests a threshold value (e.g., in "literacy rates" - contrast "knowledge rates")

Implies a universally achievable ability.
A literacy myth surrounds us. Literacy is considered a basic human right and a tool for productive citizenship and fulfilling lives, yet world illiteracy continues at a high rate. Although literacy is closely associated with basic western values and key elements of our social thought, tests reveal that children are not learning to read.

Harvey Graff, *The Literacy Myth*, 1979

“...the acquisition of literacy is a necessary precursor to and invariably results in economic development, democratic practice, cognitive enhancement, and upward social mobility. Despite many unsuccessful attempts to measure it, literacy in this formulation has been invested with immeasurable and indeed almost ineffable qualities, purportedly conferring on practitioners a predilection toward social order, an elevated moral sense, and a metaphorical “state of grace.”

“The Literacy Myth,” *Encyclopedia of Language and Education*
Socio-Economic Benefits of Literacy

I have known many persons rise to wealth and respectability by their industry, virtues, and self-taught skill; but from their utter want of training in the proper mode of writing, or speaking, or reading their native tongue, they are unable to fill the situations to which their circumstances and talents and characteristics entitle them, and in which they might confer great benefits on society.

Eggerton Ryerson, Chief Superintendent of Education for Upper Canada, 1849
Socio-Economic Benefits of Literacy?

But assumptions about literacy and social advancement are not always justified.

"The literate English farm labourer of the late eighteenth century fared no better (and possibly even worse, due to the prejudices of his employer) than his illiterate companion." Laurence Stone

Literacy as indication of tractability rather than as a job skill…
Political Importance of Literacy

Historical roots:

1792 postal legislation establishes low rates for newspapers, free exchange of papers bet publishers.
“cabalistic concealments”
Postal reforms of 1840 reduce rates for letters…
The Growth of Public Libraries

Subscription libraries (Franklin founds Library Company of Philadelphia: 1731); Town libraries (Boston, 1848; NY, 1849)

UK: Public Libraries Act of 1850 provides for "libraries freely open to the public... in towns in Great Britain and Ireland" passed w/ Conservative opposition

Later: Carnegie libraries. 1700 public libraries in US between 1883 and 1929, 660 in UK
Functions of the Library: Political Objectives

Libraries (and literacy in general) as bulwarks against demagoguery etc.

[To the free library] we may hopefully look for the gradual deliverance of the people from the wiles of the rhetorician and stump orator…. As the varied intelligence which books can supply shall be more and more widely assimilated, the essential elements of every political and social question may be confidently submitted to that instructed common sense upon which the founders of our government relied.

J. P. Quincy, 1876
Reservations about Carnegie Libraries

Concerns about popularity of "immoral fiction" and availability of seditious works

"Go to the nearest Carnegie Library and examine its catalog of books. The chances are five to one that you will find the place full of literary bilge and as bare of good books as a Boston bookshop." H. L. Mencken, 1928
Modern extensions of “literacy”

Literacy has become too promiscuous. The word itself…is daily extending its application. We have more and more literacies. In both popular and learned discourse the term is attached to a proliferating body of conditions and activities. Since the 1980s the term has frequently been applied to competence in computers. Literacy has become not the forerunner of information technology but the gateway to it….

David Vincent, "Literacy Literacy," 2002
What does “Literacy” entail?

“Literacy” becomes a way of claiming status for a subject or body of material as a “basic” form of knowledge, for which the state should assume responsibility.

"Literacy" in X is considered necessary to:
- economic growth
- personal betterment,
- independent critical thinking,
- healthy public discourse.
Extension of “Literacy” to Other Fields

[Bennington promotes] the development of literacy in all the important aspects of our cultural heritage. This does not mean merely verbal literacy. … Bennington is attempting the uphill task of including the nonverbal disciplines of art and science. "The Bennington Idea," Lewis Webster Jones, *Jrnl. Ed. Soc.*, 1947

“Economic literacy” from 1950. Soon after: geographic, historical literacy, media literacy, etc.
Extension of "Literacy" to Other Fields

“Cultural literacy” from E. D. Hirsch: "What every American needs to know," "the basic information needed to thrive in the modern world"

cultural literacy, [is] the network of information that all competent readers possess. It is the background information, stored in their minds, that enables them to take up a newspaper and read it with an adequate level of comprehension...

List includes: Juno, Sir Galahad, Blarney Stone, apple of discord, "Don't give up the ship," "Close, but no cigar," éminence grise, golden parachute, ergo, NIMBY, Eucharist, François Rabelais, yarmulke, personal pronoun, Count Basie, W.C. Fields, Walter Lippmann, Foggy Bottom…
"information literacy" is justified on the same grounds as earlier literacies:

**Personal empowerment & health of public discourse**

Information literacy… is a means of personal empowerment. It allows people to verify or refute expert opinion and to become independent seekers of truth.

To say that information literacy is crucial to effective citizenship is simply to say it is central to the practice of democracy

“The Importance of Information Literacy to Individuals, Business, and Citizenship” (ACRL Report)
Achieving social & economic equality

It is unfortunate that the very people who most need the empowerment inherent in being information literate are the least likely to have learning experiences which will promote these abilities. Minority and at-risk students, illiterate adults, people with English as a second language, and economically disadvantaged people are among those most likely to lack access to the information that can improve their situations.

“The Importance of Information Literacy to Individuals, Business, and Citizenship” (ACRL Report)
The birth of “Information Literacy”

Individual betterment & strengthening of economy

...There is ample evidence that those who learn now to achieve access to the bath of knowledge that already envelops the world will be the future's aristocrats of achievement.

Every day lack of timely and accurate information is costly to American businesses.
