THE HISTORY OF INFORMATION

http://blogs.ischool.berkeley.edu/i103su09/
Agenda

- Welcome!!!!!
- The information age
- Information age and the news from Iran
- Technological determinism
- Getting to know each other
- Syllabus walk through
- Questions
Welcome
“This is South Hall, the oldest building on campus...”

“I’m not exactly sure what goes on in there... Something with technology and computers...”

“But somewhere on this building is the smallest bear on campus!”
Why INFORMATION?

- It’s everywhere!
- How MUCH information?
- We are apparently in the midst of an Information Age!
The information age

How are people talking about it?
choosing to shape the information age

"At the dawn of the 21st century a free people must now choose to shape the forces of the Information Age and the global society, to unleash the limitless potential of all our people, and, yes, to form a more perfect union."
choosing to shape the information age

“At the dawn of the 21st century a free people must now choose to shape the forces of the Information Age and the global society, to unleash the limitless potential of all our people, and, yes, to form a more perfect union.”

“Yet today our military is still organized more for Cold War threats than for the challenges of a new century -- for industrial age operations, rather than for information age battles.”
“Yet today our military is still organized more for Cold War threats than for the challenges of a new century -- for industrial age operations, rather than for information age battles.”

- George Bush, “A Period Of Consequences,” The Citadel, South Carolina, Thursday, September 23, 1999
“You don´t hear our times referred to as the Space Age anymore, instead it´s the Information Age. You will notice they call it the Information Age, not the Knowledge Age.”

information age as a tool II

- “Our new enemies take advantage of the information age and the 24-hour news cycles, creating images of chaos and suffering for the cameras, in the hope that these images will horrify the American people and undermine resolve and morale here at home.”

http://www.presidentialrhetoric.com/speeches/05.28.08.html
Information age of hysteria

“Don't want to be an American idiot/ One nation controlled by the media/ Information age of hysteria/ It's going out to idiot America”
Information age of hysteria

- “Don't want to be an American idiot/ One nation controlled by the media/ **Information age of hysteria**/ It's going out to idiot America”

- Green Day, American Idiot, 2004, american idiot
pop culture in the information age

- “If information wants to be free in the information age, then so does music.”

Information Age Replaced by Attitude Age
The Information Age is over...

by Ashaman

Sat Jun 27, 2009 at 02:41:29 PM PDT

Human history is best thought of in Ages. An Age is somewhat tied to the prevailing technology of the day, but also defined by how that technology is used, where our attention is focused.

We started with the Stone Age, where our first pieces of technology were stone blades. We then followed with a series of ages named after the best metal we could produce, Copper, Bronze, Iron, Steel. The early part of the 20th century is often considered the Industrial Age, and the late 20th century marked the beginning of the Information Age, based on computer technology.

But I can see the future, and the Information Age just ended. When historians look back at the beginning of the 21st century, they'll draw a line and say: "Here lies the beginning of the Climate Age."

Ashaman's diary :: ::

But 'climate' isn't a technology, you can't name an age after it!

Ok, fine, give me a better name then. I'm serious.

But what else are we going to call it? For the next century or so, mankind is going to be increasingly focused on two simple tasks: preventing additional climate change, and dealing with the damage to our
The paradoxical information age

- It's the great irony of our Information Age -- the very technologies that empower us to create and to build also empower those who would disrupt and destroy. And this paradox -- seen and unseen -- is something that we experience every day.

Information age: strength = weakness

- In this Information Age, one of your greatest strengths -- in our case, our ability to communicate to a wide range of supporters through the Internet -- could also be one of your greatest vulnerabilities.

- Barak Obama, ibid
What is the information age?

What makes this an information age?
What does it mean to live in an information age?
Elements of the information age

- Writing systems
- Print
- Literacy
- “the public”
- Information property
- Authoritative reference
- Newspapers
- Imagery
- Advertising

- Point to point communication - phones
- Broadcast media – TV
- Engineers, designers, technicians, researchers
- Corporations
- The Internet
- “New media”
- The state
- Information and Crisis
So what is the information age?

- information age:

  “The period beginning around 1970 and noted for the abundant publication, consumption, and manipulation of information, especially by computers and computer networks.”

So what is the information age?

“The Information Age, also commonly known as the Computer Age or Information Era, is an idea that the current age will be characterized by the ability of individuals to transfer information freely, and to have instant access to knowledge that would have been difficult or impossible to find previously”.

The information age in Iran

What is a political revolution in the information age?
Iran timeline

- June 12, 2009 – polls open; mobile networks shut down
- June 13, 2009 – protests begin
- June 14, 2009 – violence intensifies
- June 15, 2009 – march on streets
- June 16, 2009 – foreign media kicked out
- June 17, 2009 – soccer team players protest
- June 18, 2009 – more marching to mourn those killed in protests
- June 19, 2009 – Khamenei denounces protests
- June 20, 2009 – more protest, violence escalates; Neda killed
- June 24, 2009 – Moussavi website calls for more protest
- June 29, 2009 – Guardian council certifies results
- July 2, 2009 – mobile networks restored
- July 5, 2009 – Some Iran Clerics call the vote invalid

Source: NY Times, BBC
“It is still possible that the information age will crack authoritarian structures in Iran,” wrote Jon B. Alterman, director of the Middle East program for the Center for Strategic and International Studies in Washington. “But it is far more likely that the government will be able to use that technology to secure its own rule.”
“It is still possible that the information age will crack authoritarian structures in Iran,”
The "Neda video," torture, and the truth-revealing power of images

The single most significant event in shaping worldwide revulsion towards the violence of the Iranian government has been the video of the young Iranian woman bleeding to death, the so-called "Neda video." Like so many iconic visual images before it -- from My Lai, fire hoses and dogs unleashed at civil rights protesters, Abu Ghraib -- that single image has done more than the tens of thousands of words to dramatize the violence and underscore the brutality of the state response.
“the government tries to jam all foreign TV stations—in particular, the BBC’s Persian-language channel…. has been hugely influential in spreading news of the protests to Iranians who would otherwise have relied on state television or the inferior American-based Persian-language channels.”

“Forget CNN or any of the major American "news" networks. If you want to get the latest on the opposition protests in Iran, you should be reading blogs, watching YouTube or following Twitter updates from Tehran, minute-by-minute.”

Twitters

- Everybody is peaceful and quiet - everybody is wearing black - the number of people is unbelievable - SEA OF GREEN - #Iranelection 5:48 a.m. June 18 (persiankiwi)

- some of Iran's universities were closed and exams canceled after Basij attacks/ @ Tehran & Shiraz & Ahvaz & Zahedan &... #Iranelection 5:00 p.m. June 18 (madyar)

- Source: http://www.newsweek.com/id/20395
Twitter Maintenance?

I'm told that Twitter will go down tonight for an hour and half for maintenance. All I can ask is that they reconsider if they can. Taking Twitter down when it is the critical tool for organizing the resistance in Iran is Ahmadinejad's dream. This event has been Twitter's finest hour. Don't spoil it. They need you.
“In this world, a tweet from Canada leads to a Facebook fan page created in the United States, which then leads to a YouTube video from Iran. But these platforms are merely tools that allow people to connect over ideas.”

What did information technology do?

“1. It has helped Iranians communicate with each other.
2. It has helped Iranians communicate with the outside world.
3. It has helped the rest of the world communicate with both Iranians and others who sympathize with the protesters.

....

“While we can only imagine what it is like to be on the streets or to lose a loved one during this #IranElection crisis, social media has opened a direct line of accessible information to us. It may very well prove to be a key factor in the fate of Iran itself.”

Complicating the story

“But it is far more likely that the government will be able to use that technology to secure its own rule.”
Doubting Twitter
Let's not get carried away about its role in Iran's demonstrations.

By Jack Shafer
Posted Wednesday, June 17, 2009, at 5:33 PM ET

Read more of Slate's coverage of Iran's June 12 election and its aftermath.

I demonstrate my personal enthusiasm for Twitter dozens of times a day by posting my own tweets, reading many of those posted by the 72 folks I currently follow, and retweeting like a magpie.

Yet my zeal for Twitter knows a limit: Unlike several other technology-friendly journalists, I've found it more noise than signal in understanding the Iranian upheaval. I'm not saying that there is no signal to be found; I'm just saying that my cognitive colander isn't big enough to strain out Iran information I can rely on. Slate
What if Twitter is leading us all astray in Iran?

Here are a few of the things that we’ve “learned” the last few days about the Iranian elections and their aftermath:
“The easiest way to stop an image, of course, is to hit the photographer; take the tape off the camera operator; and either shoot or throw anyone else in jail. From what we have managed to get off the birds in the past few days, it seems like that’s the strategy Iran’s rulers have found most reliable.”

### Getting information out?

“Using a system installed last year (and built, in part, by Nokia and Siemens), the government routes all digital traffic in the country through a single choke point.”

“On Wednesday, a reader alerted the Lede to an Iranian government Web site called Gerdab.ir, where authorities had posted pictures of protesters and were asking citizens for help in identifying the activists. That's right—the regime is now using crowd-sourcing, one of the most-hyped aspects of Web 2.0 organizing, against its opponents.”

http://www.slate.com/id/2221397/
Technical Dystopia?

- “The big story in Iran is confusion—on a daily basis, there are more questions than answers about what's really happening, about who's winning and losing, about what comes next. The surprise isn't that technology has given protesters a new voice. It's that, despite all the tech, they've been effectively silenced.”

- Farhad Manjoo, ibid
The information age?

A really complicated picture
Elements of the information age

- Writing systems
- Printing press
- Literacy
- “the public”
- Information property
- Authoritative reference

Making sense of change

What does technology DO?
What is technological determinism?

- "new technologies are discovered, by an essentially internal process of research and development, which then sets the conditions for social change and progress. Progress, in particular, is the history of these inventions, which 'created the modern world.' The effects of the technologies, whether direct or indirect, foreseen or unforeseen, are as it were the rest of history."

- Raymond Williams, Television, Technology, and Cultural Form
Claims people make about technology

"When technology shifts, it bends the culture"

Kevin Kelly, "Becoming Screen Literate," *New York Times*
2008
Claims people make about technology

- *The Death of Distance: How the Communications Revolution Will Change our Lives*
  - Frances Cairncross, 1997
Claims people make about technology

“Electric circuitry has overthrown the regime of 'time' and 'space' and pours upon us instantly and continuously concerns of all other men..”

Marshall McLuhan et al., Medium is the Massage, 1967
Claims people make about technology

- "the almost complete annihilation of time and space between the distant antipodal points of the American continent ... produced by the construction of the Pacific Railroad"
  
  - John Wesley Clampitt, *Echoes from the Rocky Mountains*, 1888
assessing claims about technology
“The hand-mill gives you society with the feudal lord; the steam-mill society with the industrial capitalist.” —Karl Marx

“Is industrial technology the necessary and sufficient condition for capitalism?” —Heilbroner.
New replaces old?
Conflating technology and institution

Grandfather: Well, I finally finished my doctoral thesis.

Woman: Way to go, Gramps.

Grandfather: Did my research at Indiana University.

Woman: Indiana?

Grandfather: Yup. IBM took the school's library...and digitized it. So I could access it over the Internet.

*She cocks her ear to take this all in.*

Grandfather: You know...It's a great time to be alive.

Tag: IBM. Solutions for a small planet.
Constraints or resources?
getting your history wrong
Because everything in her home is waterproof, the housewife of 2000 can do her daily cleaning with a hose.
Unintended consequences
Moral hazard
Making sense of it all

Understanding change = technology + institutions
Elements of the information age

So what about this information age?

“It is still possible that the information age will crack authoritarian structures in Iran,” wrote Jon B. Alterman, director of the Middle East program for the Center for Strategic and International Studies in Washington. “But it is far more likely that the government will be able to use that technology to secure its own rule.”

“But we need to remember: We're only at the beginning. The epochs of history are long -- the Agricultural Revolution; the Industrial Revolution. By comparison, our Information Age is still in its infancy. We're only at Web 2.0. Now our virtual world is going viral. And we've only just begun to explore the next generation of technologies that will transform our lives in ways we can't even begin to imagine.”

Barak Obama
The History of Information
What does information age mean?

- In Iran:
  - Institutions: The State, the Western Media, the Iranian Public, (the American Public), literacy, truth
  - Technology: Twitter, the Internet, TV, Mobile phones, networks, Cameras
  - Documents: Tweets, News, Imagery, Articles
On language

- “In many photos, riot police wear uniforms with the English word police on them. Ambulances, too, bear the word ambulance in English. Why not use Persian words instead of their English equivalents? Because everyone knows English.”

- Christopher Beam, “Prints of Persia: Why are Iranian police markings written in English?” June 17, 2009 http://www.slate.com/id/2220307/
"Is writing on a Facebook wall while you're peacefully sitting at work, is watching a YouTube video of what's happening in Iran on your iPhone -- all these things we're doing -- are they enough? I don't know,"
