1. GENERAL REMARKS

Groups

You have been assigned to one of 7 groups. Each of the groups has 6 team members. For the first part of the semester (phone project), most of your class assignments will be done as group.

Group Names

You will pick your own group name with your first phone project assignment (assigned 9/4/2003).

Group Folders

Each group will have its own folder for group files and assignments. Assignments will usually be handed in as web pages, which will be linked from your group web page. Only the members of your group will have access to your group folder. All group folders are located on the SIMS group server, named *herald*, in the *is202_phone* subdirectory \\Herald\groups\is202_phone. For now, all project group folders are labeled according to your group number (ex. Group 4's group folder is located at \\Herald\groups\is202_phone\group4). After you choose your group name in the first photo project assignment, your folder name will be changed accordingly.

Group Web Site

Every team is required to maintain its own web site. On this web site, you will publish your assignments, provide links to project files, provide information about the group members and maintain a labor division table for each group member (more about this in the first assignment). Your group web page should be ready by the due date of the first assignment (9/16/03). The 202 course web site will have a template you can use to create your own web site. The folder for your group web pages will be the *public_html* folder in your group directory (ex. \\Herald\groups\is202_phone\group4\public_html). Your project sites will be accessible via URLs like this one:

http://www.sims.berkeley.edu/academics/courses/is202/f03/phone_project/group4/

Group Mailing Lists

Every group will have its own mailing list. For now, the mailing lists have generic names, which we will change once you choose your group name.
