Task 1

You are out with your friends and you all have arrived at a bar to see live music. Upon arriving you find out there is a cover charge and a 2 drink minimum. This does not sit well with your group so you decide to use Play it by Ear to find a list of nearby music events and run them by your friends to see where they want to go.

   sub task - One of your friends asks you to give them a list of events starting with the closest ones to your current location.

Task 2

You are heading down Market Street and looking for things to do. You remember that your friend said that there is a really bad neighborhood just north of Geary Street. Find any interesting things happening south of Geary Street.

   sub task - Once you have found an event, try to discover some the smaller street names near your event.

Task 3

You have just gotten out of an art exhibit much earlier than you thought it would take. You have to meet your friend downtown, but you still have 3 hours until the agreed upon time. You were unsatisfied with this particular exhibit and want to find another interesting art exhibit between where you are now and downtown (west).

   sub task - Try to limit the events that are listed to just art events.

Task 4

You have found an event you want to attend and are looking at a detailed view of said event. You would like to know where it is in relation to where you are now, and how to get there. After finding the location you decide that you want to call the location and find out if you can make a reservation.
