# Surveys and Questionnaires

I214 Oct 21, 2010

# Steps

- Determine goals
- Decide: is this the best method given the circumstances?
- Design
  - Who?
  - Method of administering
  - Questions
    - Content
    - wording
  - Logistics
  - Analysis (yes, before you administer)

# Uses in UX Research

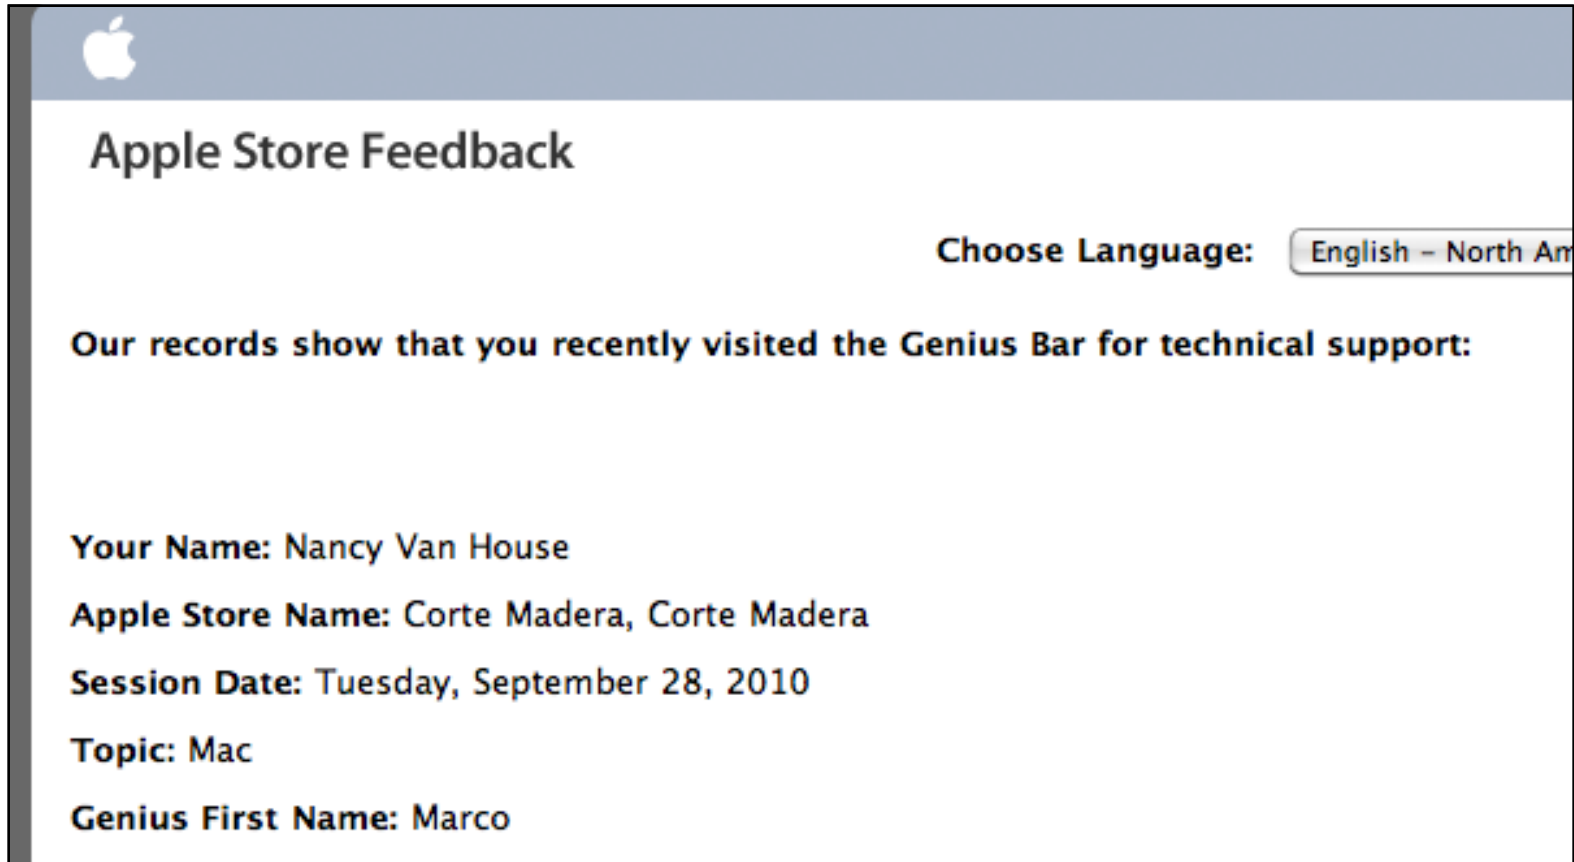

- Pre-design: survey potential users
  - What can potential users tell you?
  - (How do you find *potential* users?)
- Usability testing
  - Questionnaire for pre-qualifying participants
  - Questionnaire for info before testing (e.g., demographics, experience)
  - Questionnaire after testing
    - Evaluation on a variety of dimensions: satisfaction, ease of use, and so on

# What Info Can Be Collected via Surveys?

- Facts
  - **Characteristics of respondents**
    - Demographics, experience, employment...
  - **Self-reported behavior**
    - This instance
    - Generally/usually
    - Past
    - Anticipated (who will you vote for?)
- Opinions and attitudes:
  - Preferences, opinions, **satisfaction**, concerns, perceptions
  - Their expectations of their future behavior
- Knowledge
  - What do they they know about x, y, z

# Observation unit vs. unit of analysis

The image shows a screenshot of an Apple Store Feedback form. At the top left is the Apple logo. The title of the form is "Apple Store Feedback". On the right side, there is a "Choose Language:" label followed by a dropdown menu showing "English - North Am". Below this, a bolded message states: "Our records show that you recently visited the Genius Bar for technical support:". The form then lists several fields with their corresponding values: "Your Name: Nancy Van House", "Apple Store Name: Corte Madera, Corte Madera", "Session Date: Tuesday, September 28, 2010", "Topic: Mac", and "Genius First Name: Marco".

**Apple Store Feedback**

**Choose Language:** English - North Am

**Our records show that you recently visited the Genius Bar for technical support:**

**Your Name:** Nancy Van House

**Apple Store Name:** Corte Madera, Corte Madera

**Session Date:** Tuesday, September 28, 2010

**Topic:** Mac

**Genius First Name:** Marco

# Respondents

- Who do you *want*?
- Who can you *try* to get? How?
- Who did you *actually* get?
- How does who you did get compare with who or what you want data about?

# Types

- Cross-sectional
- Longitudinal
- Panel

# Types

- Cross-sectional

## Mobile health apps

*Percentage of cell phone users in each group who have a software application or "app" on their phone to help them track or manage their health*

Total cell phone users	9%
Age (at time of survey)	
18-29	15*
30-49	8
50-64	6
65+	5

Aug. 2010

<http://www.pewinternet.org/Reports/2010/Mobile-Health-2010/Report/Mobile-health-apps.aspx>

# Types

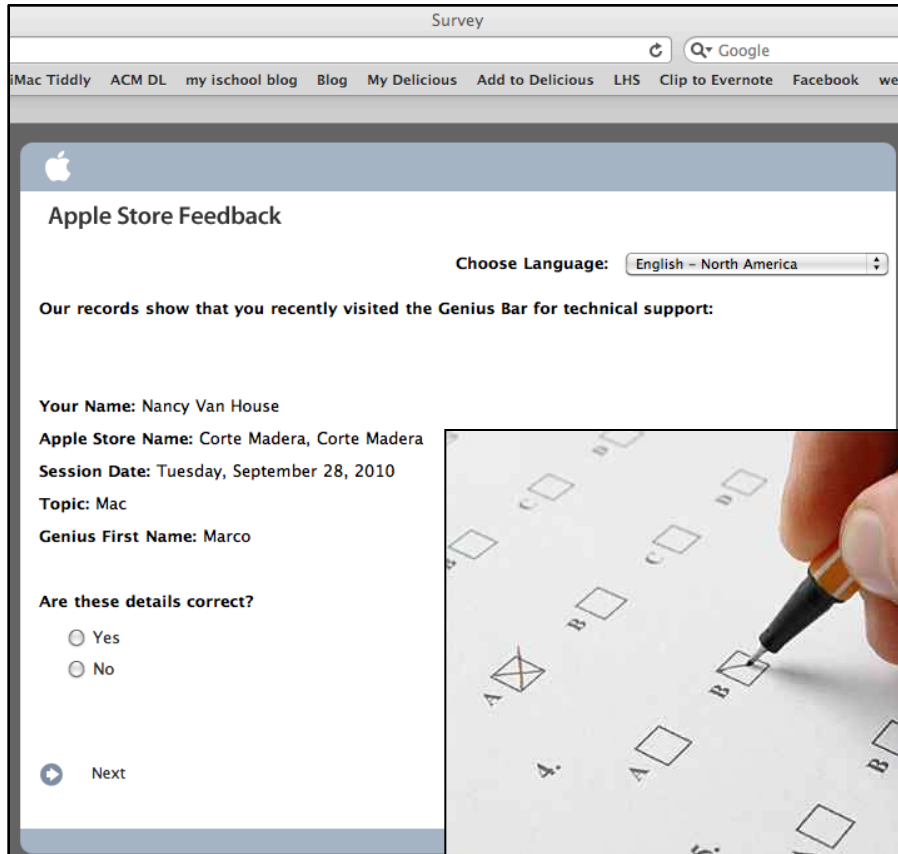

- Cross-sectional
- Longitudinal

Year	Age	% with health apps
2010	29	15%
2020	39	18
2030	49	50

- Cross-sectional
- Longitudinal
- Panel

2010 Orion Reader Survey

1. Welcome

Thanks for taking this survey!

Please note: your responses are anonymous. If you would like Orion to reply to you

1. I first found out about Orion through:

2. I have been reading Orion for:

newsletter, "Fresh from Orion."

# Ways of Administering Surveys (roughly in order of expected response rate)

- In person
- Phone
- Paper, in person
- Email (usually with a link)
- Web
- Mail
- .

# Sample

- Universe (everyone)
- Statistically valid
- Convenience
  - Self-selected
- Snowball

## Pulse Of The Bay

Should 49ers Coach Mike Singletary Be Fired?

Yes

No

Vote

[Results](#) | [Disclaimer](#) | [E-Mail](#)

Noise,

As part of my work with Yahoo I'm running a survey study looking at how people use the Internet for shopping, travel planning, and a handful of other topics. The survey takes only 10-15 minutes, your participation is anonymous, and the first 100 participants will receive a \$5 gift card to Amazon.com.

Forwarding this message to friends, colleagues, and coworkers is most welcome and appreciated.

©Nancy Van House

# Response Rates

- % of sample who actually participate
- low rates may indicate bias in responses
  - Whom did you miss? Why?
  - Who chose to cooperate? Why?
  - Compare respondents to population, if possible
- How much is enough?
  - For statistically valid sample
    - 50% is adequate; 70% is very good
  - Web surveys tend to be 3%, 5%.....

## Increasing response rates

- *Good design*
- *Short*
- *Easy to answer immediately*
- Harder to say 'no' to a person
- Explanation/request
  - Explain purpose of study
  - Why you need *them*
- Incentives
  - Reporting back to respondents
  - Money; entry in a sweepstakes
- Follow up on non-respondents (if you can)

Bob's timing was a little off.

# Some sources of error

- Sample, respondents
- Method of administration
- Question choice
- Question wording
- Question order
- Inferences from the data
- Users' interests in influencing results
  - “vote and view the results”

# Convenience sample: problems may include

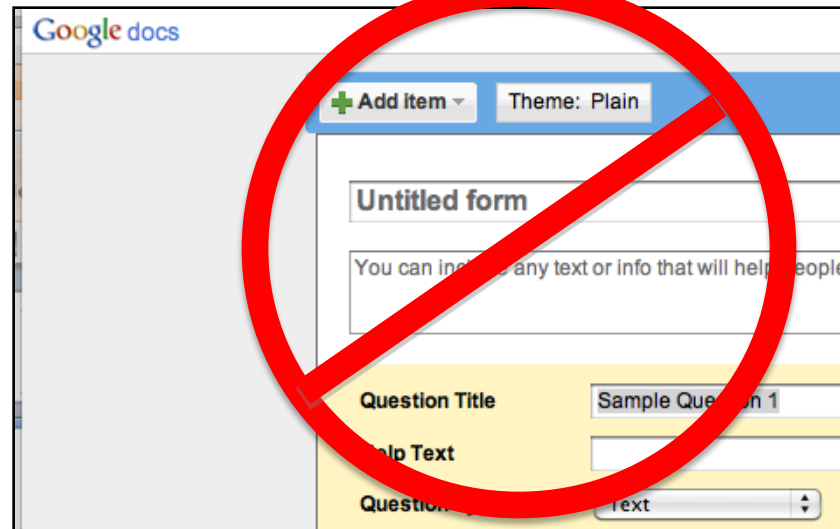

- Response rate unmeasurable
- May be difficult to compare respondents to population as a whole
- Likely to be biased (systematic error)
  - Frequent users probably over-represented
  - Busy people probably under-represented
  - Disgruntled and/or happy users probably over-represented

## Web survey problems

- Loss of context – what exactly are you asking about, what are they responding to?
  - Are you reaching them at the appropriate point in their interaction with site etc?
- Incomplete responses
- Multiple submissions
- Response rate problems
  - Low rate
  - Hard to calculate
- Is your sampling unit the user or the interaction?

**SurveyMonkey.com**  
because knowledge is everything

# What to look for in web survey software/site

- # of questions you can ask
- # of respondents
- How long the survey will be available
- Question designs/formats, or at least the designs you need
- Kind of data analysis they support
- Reports they produce for you
- Whether you can download data into Excel etc
- How long the data will be available to you
- *Most have limited free/lowcost versions, and premium*

# Questionnaire construction

- Content
  - Goals of study: What do you need to know?
  - What can respondents tell you?
- Conceptualization
- Operationalization – e.g., how *exactly* do you define “household with access to internet”? “user”?
- Question design
- Question ordering
- ***Short, short, short!***
- ***Pretest, pretest, pretest!***

# Survey content

- Characteristics of respondents
  - Demographics
  - Those relevant to your topic
- Activity
  - In general
  - Specific to this topic
  - Specific to this product
- Attitudes, opinions
  - ditto
- Knowledge
  - ditto

# 2010 Orion Reader Survey

## 1. Welcome

Thanks for taking this survey!

Please note: your responses are anonymous. If you would like Orion to reply to your feedback or if yo

**1. I first found out about Orion through:**

**2. I have been reading Orion for:**

- less than 1 year
- 1 - 2 years
- 3 - 5 years
- 5 - 10 years
- 10+ years

**3. I am currently a subscriber.**

- yes
- no

**4. I receive Orion's e-mail newsletter, "Fresh from Orion."**

- yes
- no
