“What had begun, in the 1910s, as a vivid and exuberant exploration of the materiality of signification, became, by the end of the 1920s, in the hands of Herbert Bayer and Jan Tschichold, an ordering of visual graphics which caused that very materiality to efface itself, to disappear, under the style of a graphics whose very adjectival character—elegant, clean, streamlined, balanced, correct—betray its repressive force.”

Interrelation of Function and Form.
When letters are used to build up words, lines and type are as problems of function and form arise. We shall explain them here with reference to the German word "buch."

In figure 1, we first read "buch," while the graphic pattern is a secondary matter. Legibility is thus assured as a first essential. Typography is good when this end is attained by formally unexceptional means, which is here no doubt the case. In figure 2, the line is stood on end; legibility is now impaired, while emphasis is placed on the pattern; form thus comes from function. In figure 3, the inverted line makes an almost pure pattern of very doubtful legibility. The mirror reflection (figure 4) though familiar to the compositor, is likewise illegible to the layman and is seen only as a pattern. By rearranging the letters (figure 5), a pattern of some beauty may be created, but the word is now quite illegible (a proof that the formal qualities of a type face are more easily recognized in a strange language). In figure 6, the letters are completely reorganized. Straight lines and curves constitute an interplay of graphic forms without any communication: typography has lost its purpose.

Homework for week 5

Find both successful and unsuccessful examples of layout design in posters and flyers. Post the photos of your examples and briefly describe what is working and what is not working in terms of layout.
