

# Welcome to Interface Aesthetics 2009!

# Kimiko Ryokai

# Daniela Rosner

## OUTLINE

**What is aesthetics?**

**What is design?**

**What is this course about?**

INTRODUCTION

# Why interface aesthetics?

# Why interface aesthetics?

Technology as part of everyday culture, so that it's beautiful and intriguing, so that it has emotive as well as functional qualities.

[Moggridge, 2006]

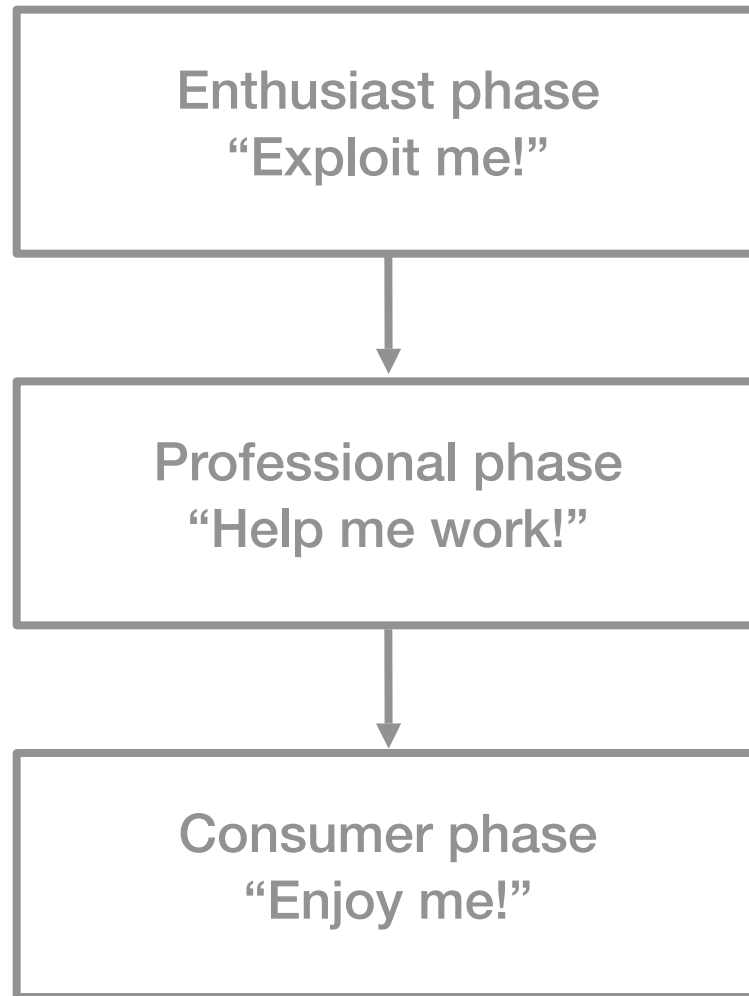

## INTRODUCTION

If we only design the function of something, not what it also communicates, we risk our design being misinterpreted. Worse, we waste an opportunity to enhance everyday life.

[Moggridge, 2006]

# Designing for a new broad spectrum of people.

AESTHETICS

# Aesthetics in HCI

# Aesthetics in HCI

Visual attractiveness of a web site affected users' enjoyment as well as their perceptions of ease of use and usefulness.

[van der Heijden, 2003]

# Aesthetics in HCI

Aesthetics is a strong determinant of the pleasure the user experiences during the interaction.

[Hassenzahl, 2004]

# Does aesthetics have an effect on the user's performance?

		aesthetics	
		low	high
usability	low		
	mid		
	high		

“low aesthetics” system

“high aesthetics” system

# Results of the study by Ben-Bassat et al.

The more beautiful, the higher  
the perceived usability  
More aesthetic systems  
were perceived to be  
slightly more usable.

[Ben-Bassat, Meyer, Tractinsky, 2006]

**Usable things appear more beautiful**

**High usability systems were always judged as more aesthetic.**

[Ben-Bassat, Meyer, Tractinsky, 2006]

# Fast judgment on aesthetics and usability

Importance of first  
impressions in shaping  
users' attitudes towards  
interactive systems.

[Ben-Bassat, Meyer, Tractinsky, 2006]

**Perceived usability and aesthetics are positively correlated.**

**No positive aesthetics effect  
on performance**

**Performance with low  
aesthetic systems was  
slightly better than with  
high aesthetic systems.**

[Ben-Bassat, Meyer, Tractinsky, 2006]

**Aesthetics has a positive effect on perceived usability, but not on performance.**

# Limitations?

“low aesthetics” system

“high aesthetics” system

# Limitations

- Limited aspect of aesthetics
- Nature of the task
- 150 engineering students
- ...

AESTHETICS

# What is aesthetics?

# What is aesthetics?

The philosophical study of beauty and taste.

Examines what makes something beautiful, sublime, ugly, disgusting, cute, fun, etc.

**Your top 10 beautiful objects**  
Please write them down on  
the Post-Its.

AESTHETICS

# Aesthetics in design

# Three levels of human processing

Visceral level

Behavioral level

Reflective level

[Norman, 2004]

AESTHETICS

# Visceral level

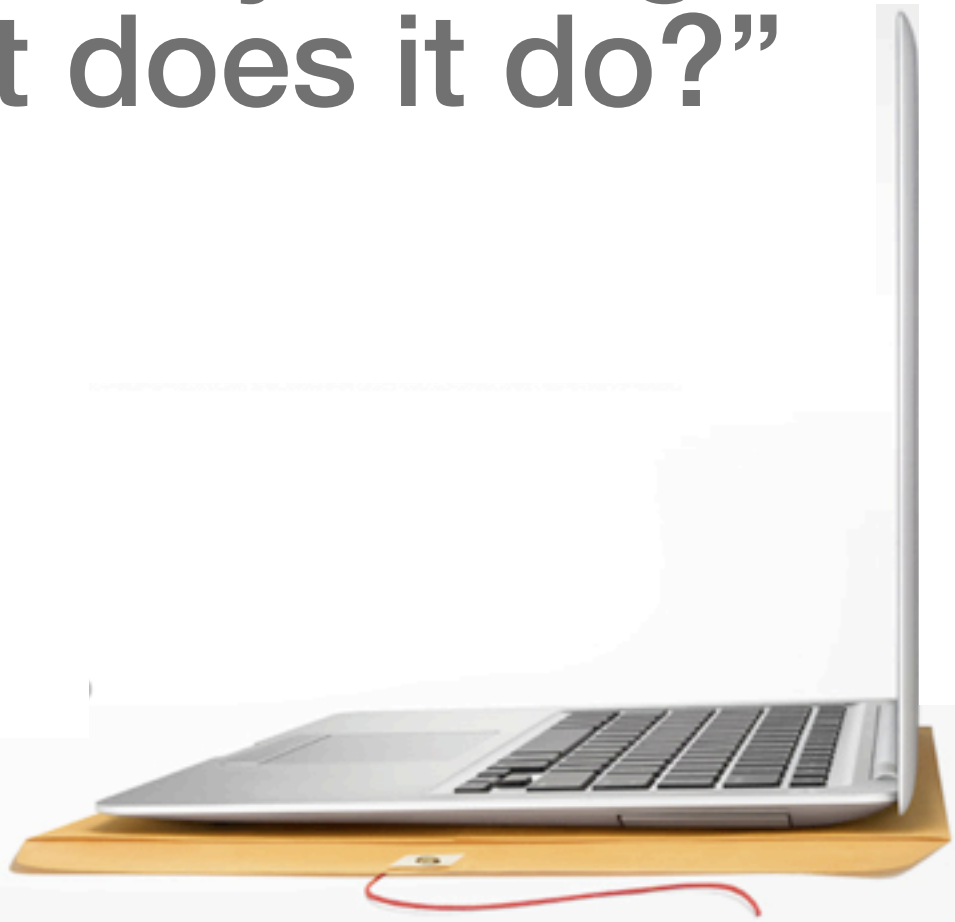

VISCERAL DESIGN

**What nature does.  
Physical features,  
look and feel, dominate.**

Visceral design is about initial reactions. “I want it!”  
And then you might ask,  
“What does it do?”

Visceral design is about initial reactions. “I want it!”  
And then you might ask,  
“What does it do?”

The principles underlying visceral design are consistent across people and cultures. If you design according to these rules, your design will always be attractive even if somewhat simple.

AESTHETICS

# Behavioral level

**Behavioral design is all about use. Appearance doesn't really matter. Performance does. What usability practitioners focus on.**

**Expectation driven.  
Positive affect results from  
feeling in control.  
Lack of control and mismatch  
between expectations and  
actual experiences produces  
negative affect.**

AESTHETICS

# Reflective level

**It is all about message,  
about culture, and about  
the meaning of a object or  
its use.**

REFLECTIVE DESIGN

**What owning it means for us.  
Concerned with reflective  
self-image.**

Conscious and aware of emotional feelings. It uses the rich history of prior experiences, one's own self image, and personal meanings to evaluate any experience.

## Visceral

- What nature does
- Immediate reaction
- Look and feel dominate
- Consistent across people and cultures
- Sub-conscious

## Behavioral

- All about use
- Performance matters
- Appearance doesn't matter
- Expectation driven
- Usability
- Sub-conscious

## Reflective

- All about the message
- Reflective self-image
- What owning it means for us
- Rich history of prior experiences
- Conscious and intellect driven

# HCI as both a research and design discipline

The field is analytical, capable of finding fault, but not capable of actual design. We need to become designers, not just analyzers.

[Norman, 2004]

DESIGN

# What is design?

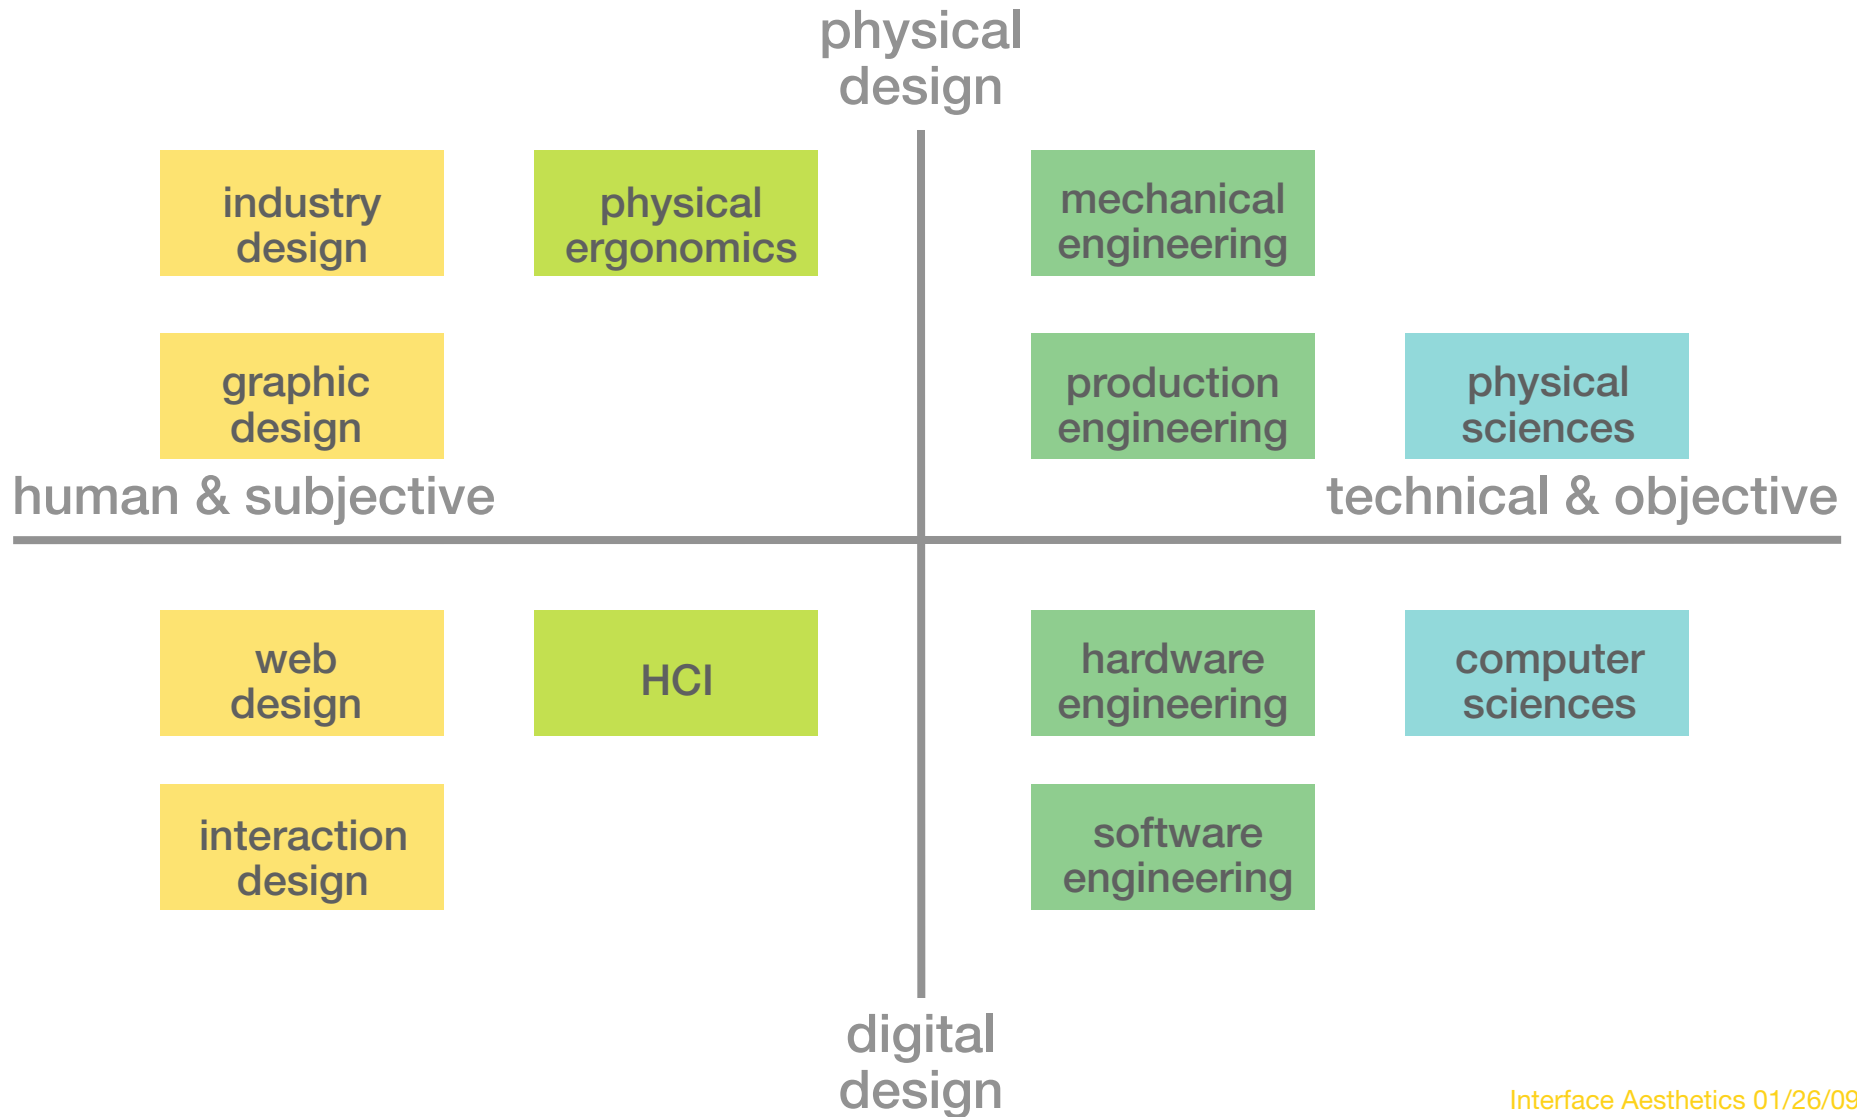

# Design

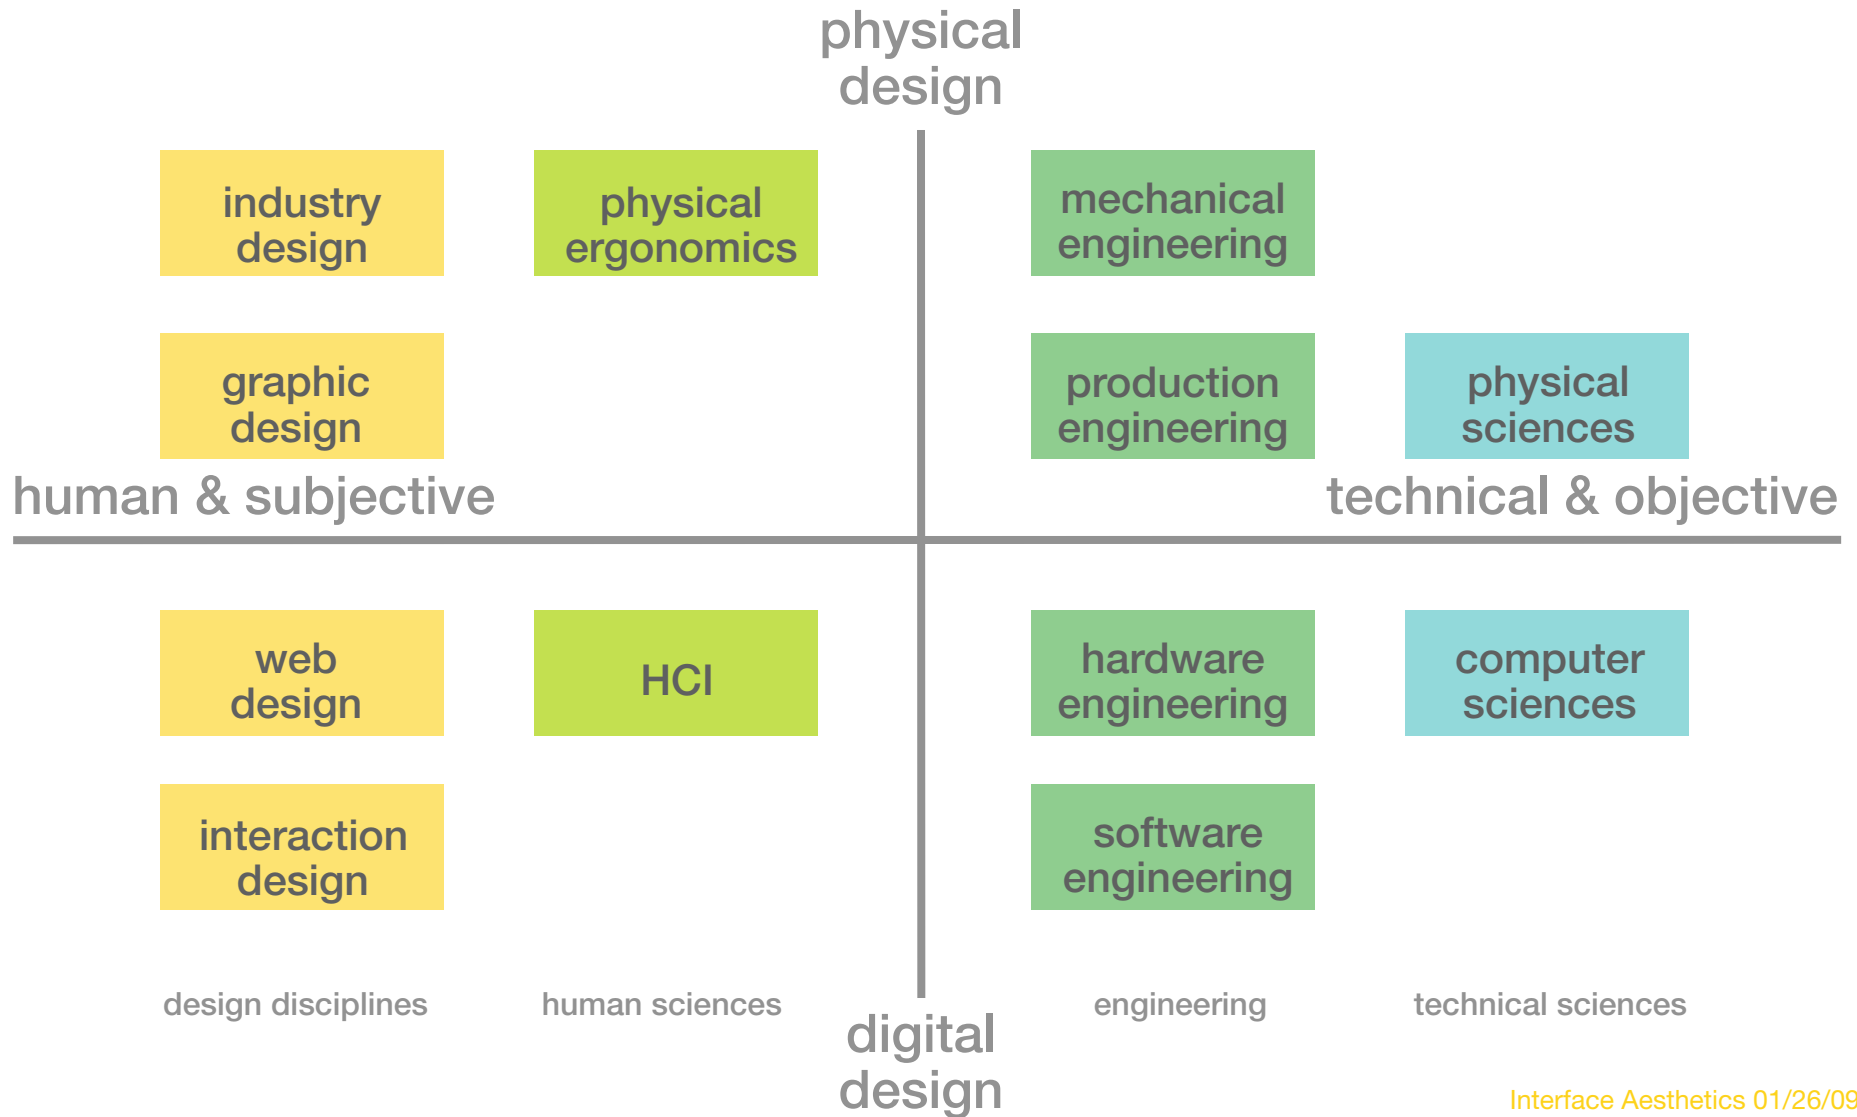

## Verb:

The process of originating and developing a plan for a product, structure, or component.

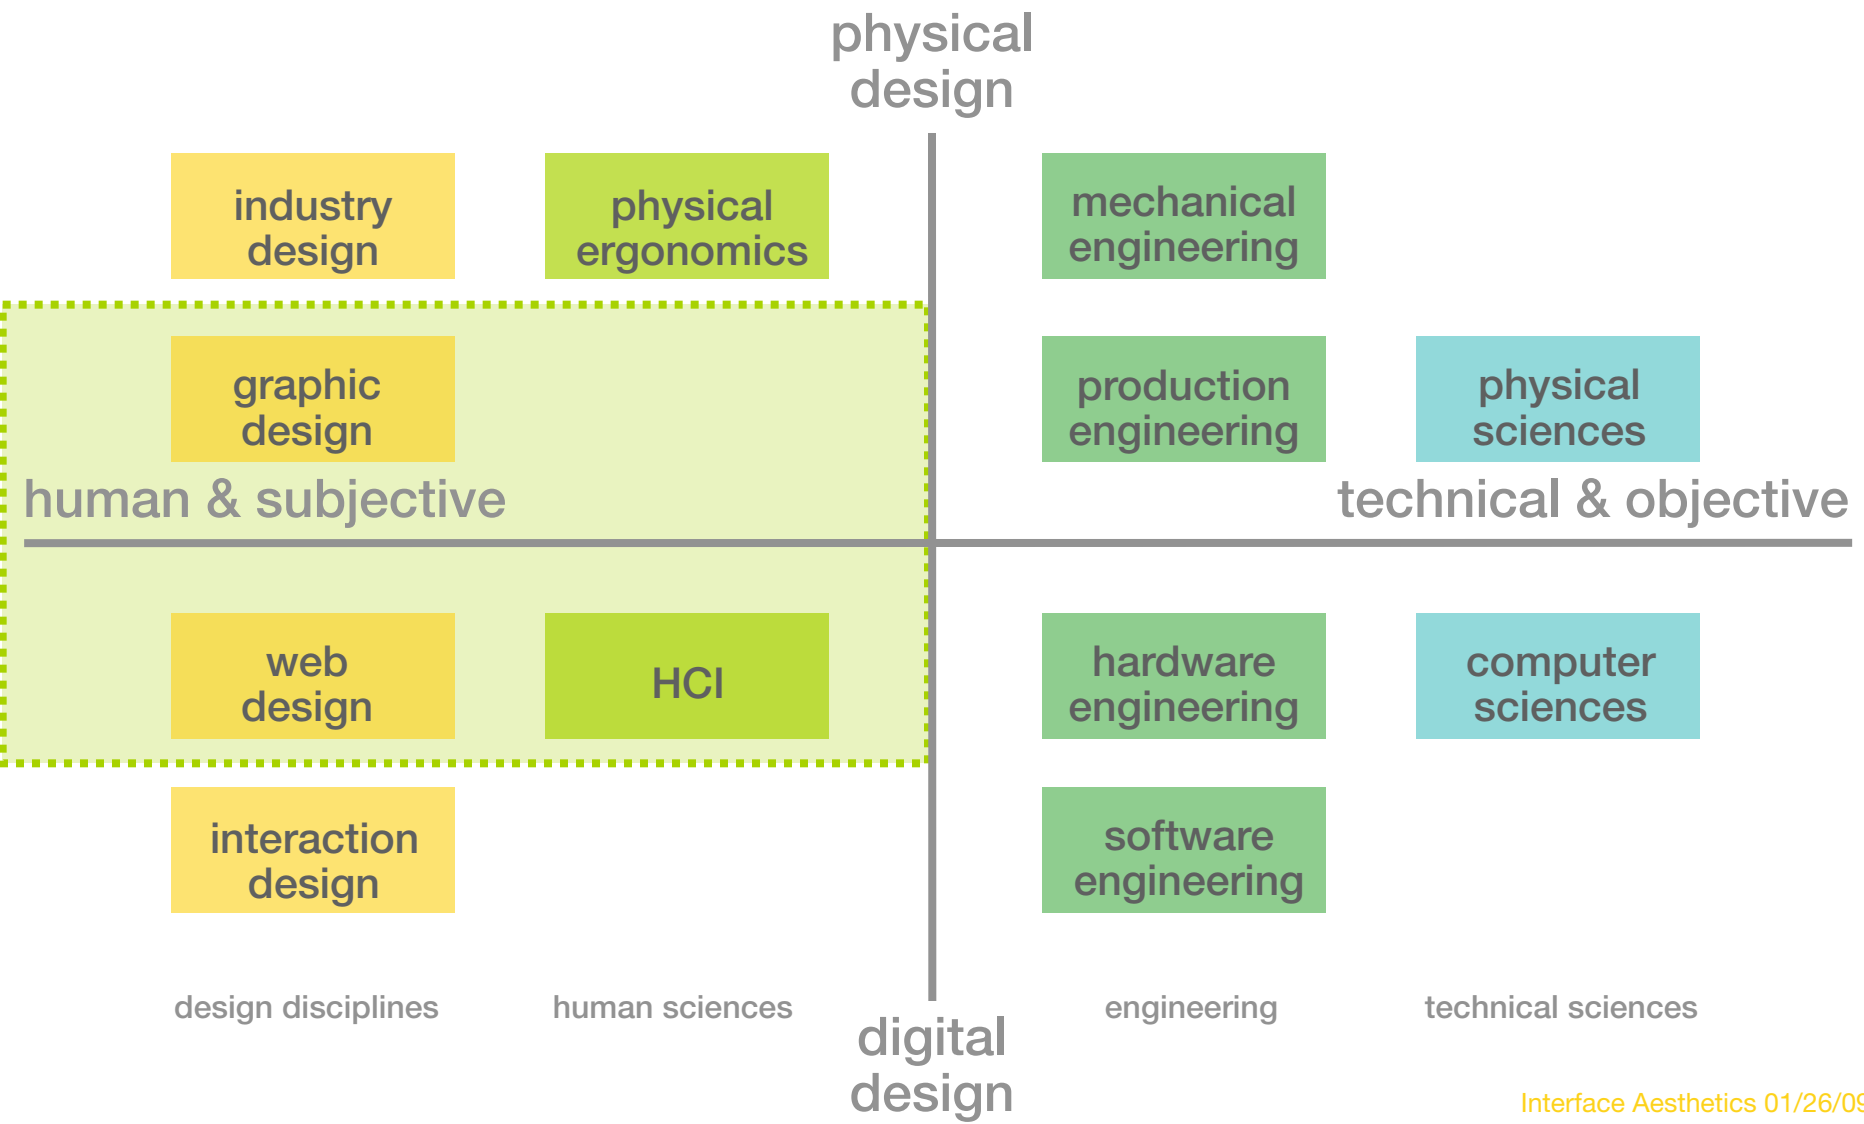

## Noun:

The final plan or the result of implementing that plan.

# Design

DESIGN

# Content vs. container

The content is important  
but...

DESIGN

# There is what you say and how you say it

[Paul Watzlawick, 1922]

DESIGN

# You cannot not communicate

[Paul Watzlawick, 1922]

# Design as communication

Design is a conversation between designer and user, even though the designer is no longer present once the user enters the scene.

[Norman, 2004]

# Designed affordances

Messages from designer to user, attracting attention to the set of desired possible actions.

[Norman, 2004]

Artists and designers are trained to use the language of implicit meanings to add a rich communicative element over and above direct functional communication.

[Moggridge, 2006]

**Good designers learn the rules before they start breaking them.**

Good design comes from the successful synthesis of a solution that recognizes all the relevant constraints, and the nature of the constraints defines the difference between design disciplines.

[Moggridge, 2006]

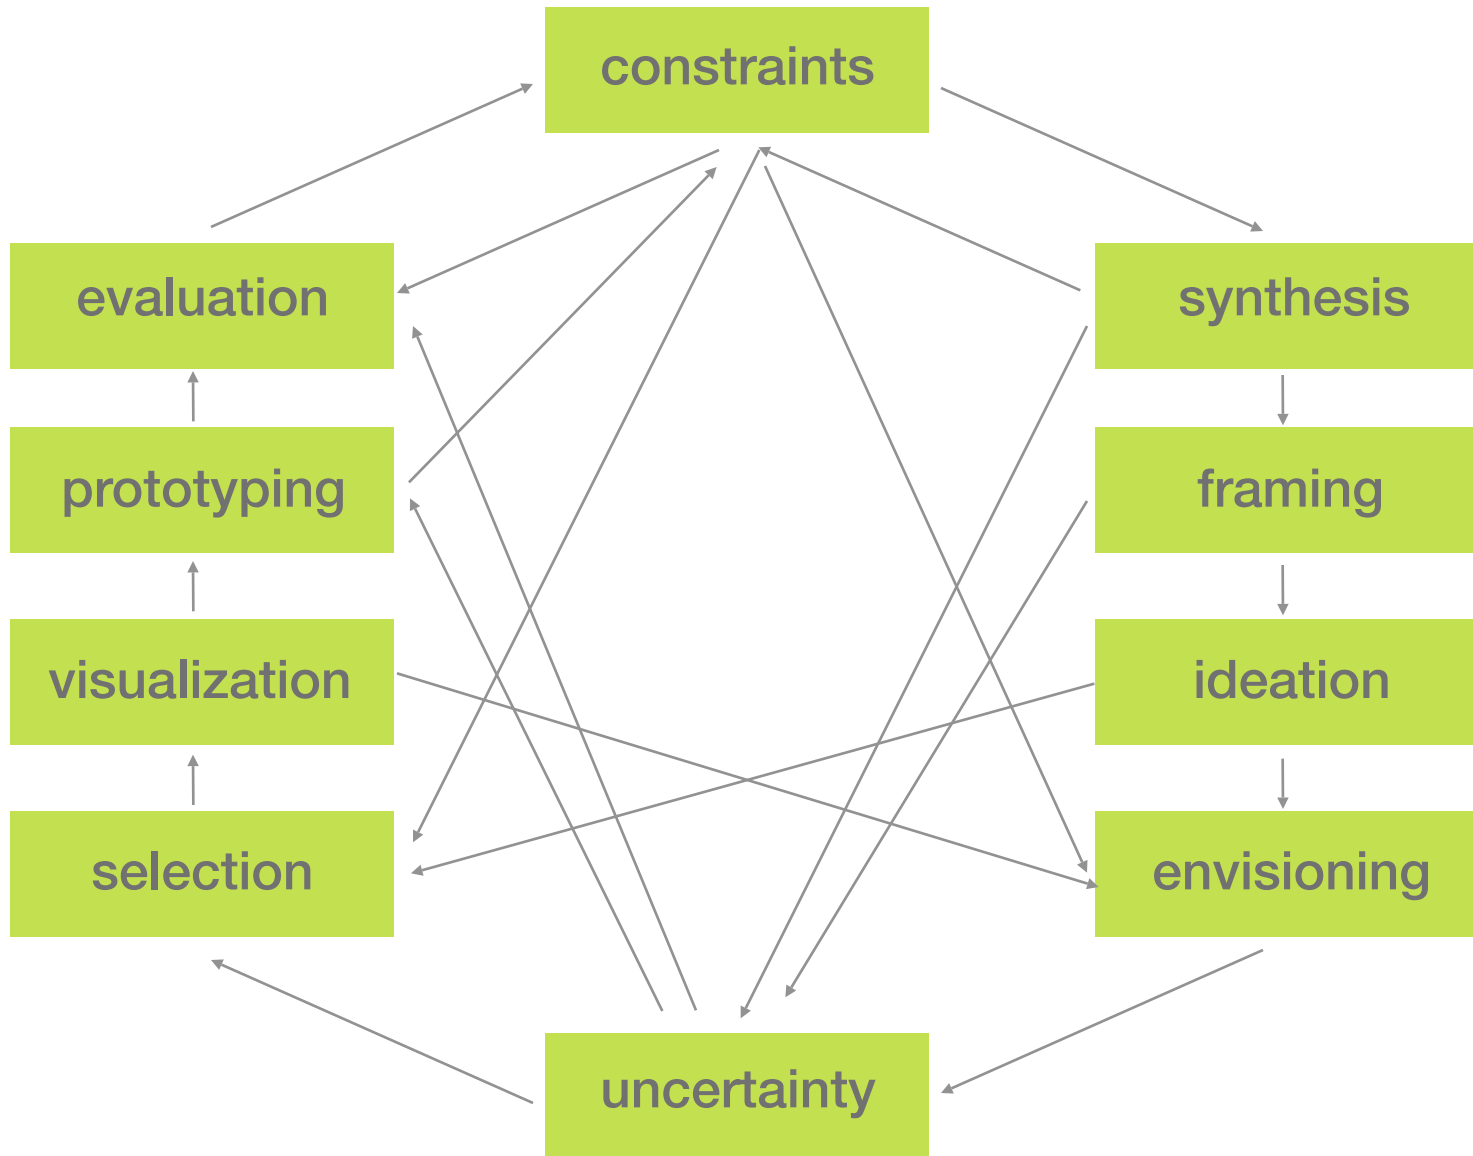

# Core design skills

1. Synthesis
2. Frame/reframe
3. Envision alternatives
4. Choose best approach
5. Visualize and prototype

DESIGN

# Iterative non-linear process Like a pinball game.

DESIGN

# Design is never done

GRiD Compass computer: first sketch [Moggridge, 1980]

DESIGN

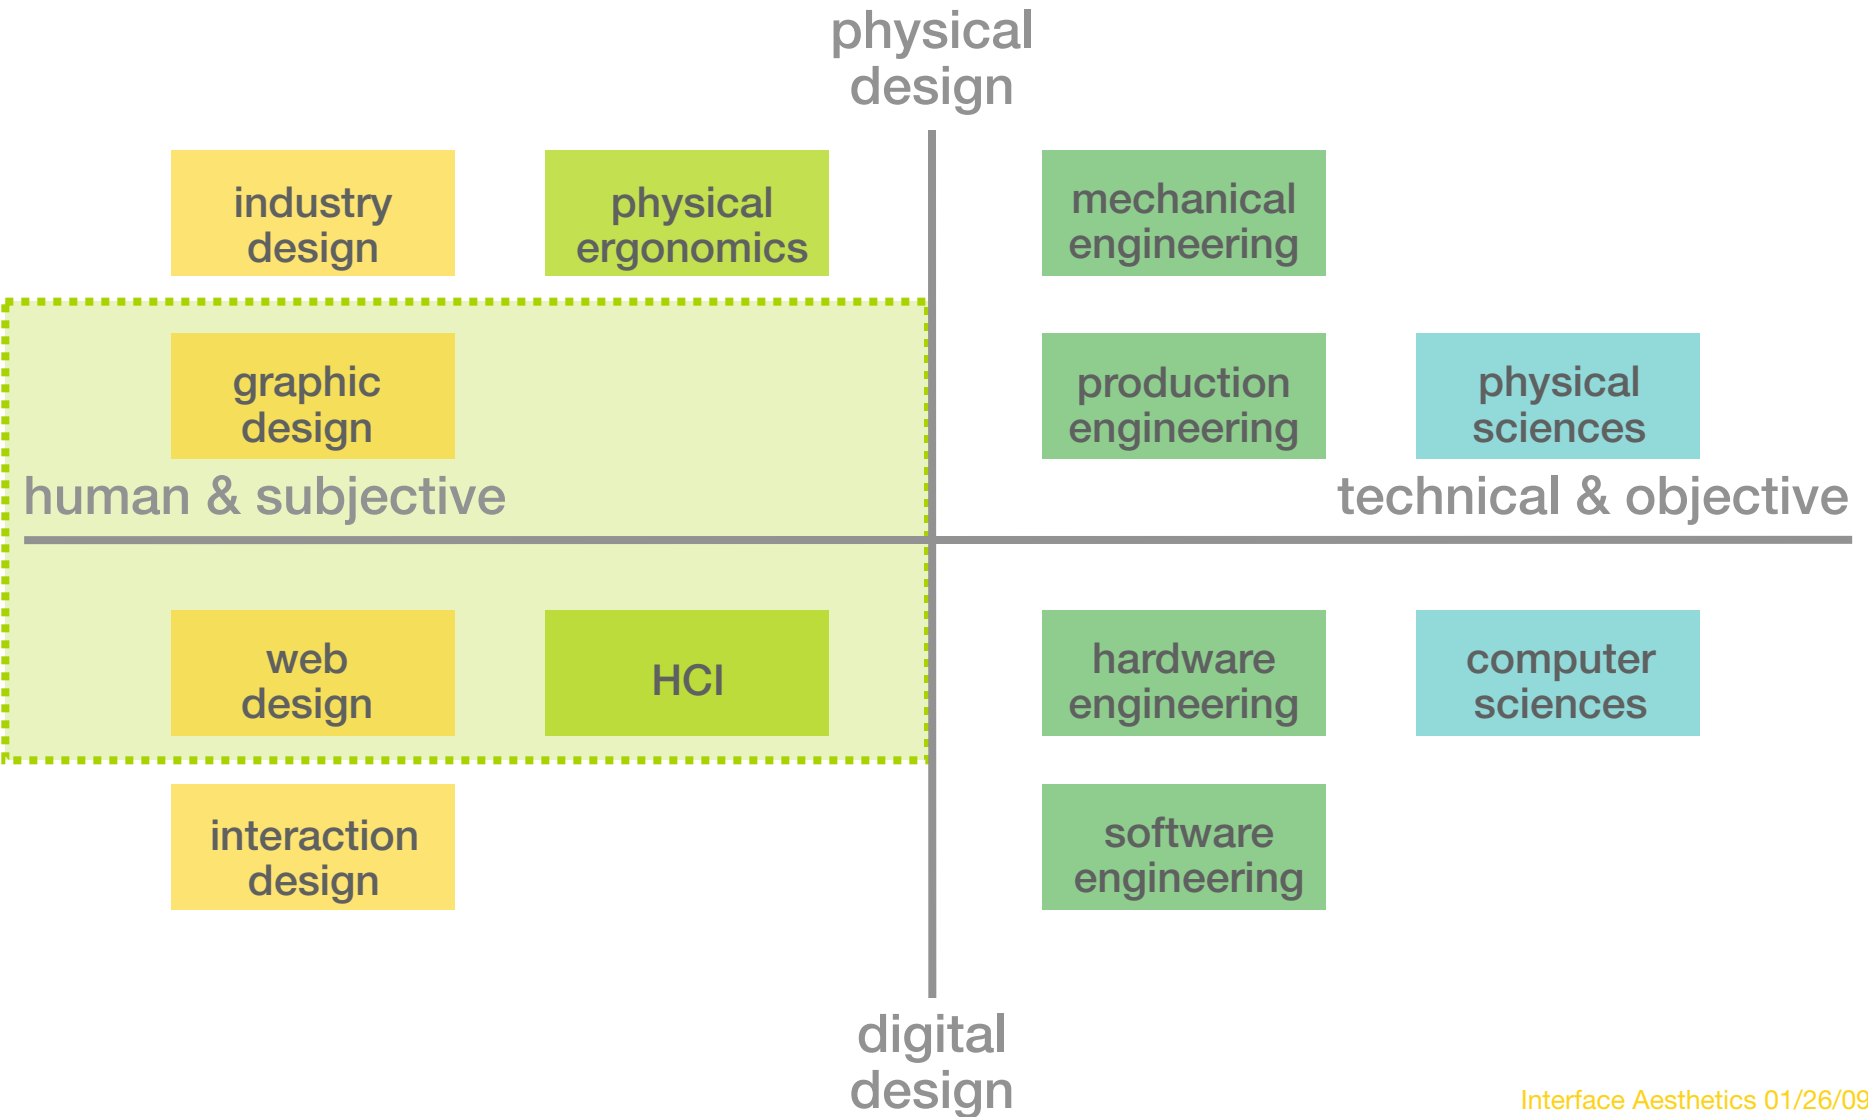

# Design challenges change all the time

# What this course is about

**Technology as part of everyday culture, so that it's beautiful and intriguing, so that it has emotive as well as functional qualities.**

[Moggridge, 2006]

# How to communicate meanings through design

Look at design principles.

## COURSE SCHEDULE

01/26	Introduction
02/02	Typography I
02/09	Layout & the Grid
02/23	Typography II
03/02	Critique I: Type / Layout
03/09	Color
03/16	Pictograms, Logos, & Icons
03/30	Critique II: Color & Signs
04/06	Print Media
04/13	Web Design
04/20	Critique III: Web
04/27	Project Progress Report
05/04	Synthesis
05/11	Exhibition

## COURSE SCHEDULE

	01/26	Introduction
<b>Assignment 1:</b> Typography I	02/02	Typography I
<b>Assignment 2:</b> Layout	02/09	Layout & the Grid
<b>Assignment 3:</b> Typography II	02/23	Typography II
	03/02	Critique I: Type / Layout
<b>Assignment 4:</b> Color	03/09	Color
<b>Assignment 5:</b> Logos & Icons	03/16	Pictograms, Logos, & Icons
	03/30	Critique II: Color & Signs
<b>Assignment 6:</b> Print Media	04/06	Print Media
<b>Assignment 7:</b> Web Design	04/13	Web Design
	04/20	Critique III: Web
	04/27	Project Progress Report
	05/04	Synthesis

<b>Assignment 7:</b> Web Design	04/13	Web Design
	04/20	Critique III: Web
	04/27	Project Progress Report
<b>Pick 3 pieces and present them with a unified theme.</b>	05/04	Synthesis
	05/11	Exhibition

# The course format

Lectures, in-class exercises,  
and discussions.

**The course is NOT about**  
How to use tools,  
implementing “working  
prototypes,” or a complete  
graphic design course.

INTERFACE AESTHETICS

**Week 2**

**Typography I**

# Homework for week 2

Think about your favorite object (could be a physical thing or a virtual thing) and describe its aesthetic quality based on the three levels of processing — Visceral, Behavioral, Reflective — we have discussed in the class.

Post your writing on the course website with a photo or a sketch/illustration of the object. Please submit your post by Sunday evening.

[Homework & Assignments](#)
[Course Description](#)

## Syllabus

### Jan 26 Introduction

#### Week 1

Lecture: Introduction and Issues of Aesthetics in HCI

Homework: [Discuss "Aesthetic Quality" \(due Feb 1\)](#)

#### Recommended Readings:

- Ben-Bassat, T. Meyer, J. Tractinsky, N. Economic and subjective measures of the perceived value of aesthetics and usability. ACM TRANSACTIONS ON COMPUTER HUMAN INTERACTION. 2006, VOL 13; NUMB 2, pages 210-234.
- Moggridge, B. [Designing Interactions](#). MIT Press, 2006.
- Norman, D. [Emotional Design: Why We Love \(Or Hate\) Everyday Things](#). Basic Books, 2004.

### Feb 02 Type I

#### Week 2

Lecture: Introduction to Typography

Assignment 1: Typography (due February 9 in class)

#### Recommended Readings:

- "The Elements of Typographic Style" by Robert Bringhurst
- "Typography" by Wolfgang Weingart, 2000
- "Designing with Type: The Essential Guide to Typography," by James Craig, Irene Korol Scala, William Bevington

### Feb 09 Layout

January 2009
