LAST WEEK ON IO LAB

jQuery UI. We looked at examples using this library and how to read the documentation.

Project 4 was due today at noon. Students will be demonstrating their work today in class.
INFORMATION ORGANIZATION LAB

IO LAB

INFORMATION ORGANIZATION LAB
- 4 to 5 minutes per group. this will be strictly enforced!
- Start by showing us something (you’re welcome to introduce it as you’re showing it)
- Tell us an interesting piece of technology that you used to build your project
Different search domains, different ideas of the importance of recall and precision. Different sources of documents. Not all of these search services are in direct competition with Google (yes, some because they are defunct).

Project 5
- Introduce the topic/concept
  - Anything related to retrieval, we have some ideas on the course website, but we’re very open on this project
- new group
- choose whoever you want to be in your group (maximum of 3 people)
- we STRONGLY encourage you to find a group where you’ll be able to contribute substantially, even if that means doing a smaller project
IO LAB SHOWCASE 2010

• December 10, 3 to 5pm
• Present your awesome projects from the semester to the public — invite your friends!
• Present Project 5 just to IO Lab beforehand (1:30-2:30ish)
• Project 5 is due December 10, 9am

Due Friday morning at 9:00am, later than usual to give you extra time, but this will require time management on your part.
FOR NEXT WEEK

Web Security in this Thursday’s Lab Lab.

Form a group for Project 5.
