

Table of Contents

Preface	3
Chapter 1 Introduction	1
1.1 A Historical Perspective	1
1.1.1 Technology View	2
1.1.2 User and Organization View	3
1.1.3 Change is Unrelenting	4
1.2 Computing In The Future	5
1.3 Roadmap to the Book	6

Part I: The Applications

Chapter 2 Applications Supporting Individuals and Groups	11
2.1 Three Ingredients	12
2.1.1 Information Technology	12
2.1.2 Information Content	13
2.1.3 Users and Applications	13
2.2 Social Applications	15
2.2.1 Characteristics of User Groups	15
2.2.2 Styles of Social Applications	18
Communication Style	18
Coordination Style	19
2.2.3 Remote Conferencing with Shared Workspace	20
2.2.4 Groupware	22
2.2.5 Discussion Forums	24
Chatroom	24
Listserver	26
2.2.6 Cyberspace Applications	26
Broadcasting	27
Mass Publication	27
Information Retrieval	28
Consumer Electronic Commerce	28
Recommendation Sharing	28
2.2.7 Back to the Big Picture	28
2.3 Information Management	30
2.3.1 What is Information?	30
2.3.2 Finding Useful Information	31

User-directed Access	32
Assistance from Others	33
Third-party or Collective Recommendations	34
Third-party Organization and Indexing: Digital Libraries	35
2.3.3 Autonomous Information Sources	37
User Control: Subscriptions	37
User Awareness: Notifications	39
Timing	39
Push and Pull in Social Applications	39
2.4 Education and Training	41
2.5 *Open Issue: Information and Communication Glut	42
Chapter 3 Applications Supporting Organizations	47
3.1 Examples of Organizational Applications	50
3.1.1 Customer Care	51
3.1.2 On-line Book Selling	52
3.1.3 On-line Stock Trading	54
3.1.4 Floral Delivery Service	55
3.1.5 Observations	56
3.2 Departmental Applications	57
3.2.1 On-line Transaction Processing	57
3.2.2 Workflow	58
3.2.3 From Centralized to Decentralized Computing	58
3.3 Enterprise Applications	59
3.3.1 Operations	60
Business Processes	60
Business Transformation	60
Enterprise Resource Planning	62
3.3.2 Decision-support	64
3.3.3 Knowledge Management	65
3.4 Electronic Commerce	66
3.4.1 Types of E-commerce Applications	67
3.4.2 Steps in a Sale	68
Matching Buyers and Sellers	69
Negotiating Terms and Conditions	70
Consummation	71
Customer Support	71
3.4.3 Role of Intermediaries	71
3.4.4 Consumer E-commerce.....	72
3.4.5 Inter-Consumer E-commerce.....	74
3.4.6 Inter-Enterprise E-commerce.....	75
Direct Procurement	75

Indirect Procurement	78
3.5 Critical Societal Infrastructure	78
3.6 Parallels Between Social and Computing Systems	79
3.7 *Open Issues	80
3.7.1 The Productivity Paradox	80
3.7.2 How do New Organizational Applications Get Invented and Developed? ..	81
3.7.3 Better Accommodating Change	81

Part II: Architecture

Chapter 4 Information Technology	85
4.1 Information Content	85
4.1.1 Bits as a Building Block	86
4.1.2 Information is Represented by Data	86
4.1.3 Data Processing.....	89
4.2 Building Blocks	90
4.3 System Architecture	91
4.3.1 Elements of Any Architecture	92
4.3.2 Emergence	94
4.3.3 Hierarchy	94
4.4 Networked Computing Infrastructure	95
4.4.1 Infrastructure Software Layering	97
4.4.2 Communications	98
Network Functions	99
Network Topology	100
4.4.3 Storage	101
Files System	101
Database	102
Database Management System (DBMS)	102
4.5 The Internet	103
4.5.1 Intranet	104
4.5.2 Extranet.....	105
4.5.3 Nomadic and Mobile Internet Access.....	107
4.5.4 Internet Application Suite	107
4.6 *Open Issues	107
4.6.1 Pacing Change	107
4.6.2 The Future of Intranets	108
4.6.3 Archiving Digital Information	108
Chapter 5 Client-Server Computing	113

5.1 Two Host Architectures	113
5.1.1 Client-Server	113
5.1.2 Peer-to-Peer	116
5.2 Three-tier Client-server	117
5.2.1 Thin- and Ultra-thin Clients	119
5.2.2 World-Wide Web.....	120
5.3 Application Examples	121
5.3.1 On-line Book Merchant	121
5.3.2 Floral Delivery Service	123
5.4 *Trends in Client-server	124
5.5 *Open Issue: Beyond Client-Server Computing	125
Chapter 6 Architecture and Infrastructure	129
6.0.1 Software Complexity	129
6.1 Modularity	131
6.1.1 Properties of Modularity	131
6.1.2 Granularity and Hierarchy	134
6.1.3 Interfaces.....	134
Actions	136
Parameters and Returns	136
Action Menus	137
Data types	138
Protocols	141
Human Interfaces	141
Messages	143
6.2 More on Layered Infrastructure Software	143
6.2.1 Goals of the Infrastructure	144
6.2.2 Layering Principle.....	144
6.2.3 The Layers in a Computing Infrastructure.....	146
6.2.4 Data and Information in Layers	149
A Package of Data	150
Responding to Platform Heterogeneity	151
More Layering Principles	154
6.2.5 The Horizontal Layer Interface.....	156
6.2.6 The Spanning Layer.....	156
6.3 *More on Good Architectures	158
6.3.1 Abstraction.....	158
6.3.2 Encapsulation.....	160
6.3.3 Flexibility.....	161

Part III: The Industry Context

Chapter 7	Computer and Communications Industry	166
7.1	Participants, Products and Services	166
7.1.1	Components and Integration	166
7.1.2	Suppliers, providers, and consumers	167
7.1.3	Types of Information Goods	169
7.1.4	Types of Software Goods	169
7.1.5	Equipment	170
7.2	The Changing Industry Structure	171
7.2.1	The Role of Architecture	171
7.2.2	From Stovepipe to Integrated Infrastructure	172
7.2.3	Less Vertical Integration and More Diversification	175
7.2.4	Venture Capital and Start-up Companies	178
7.2.5	Computing/Communications Convergence	178
7.3	Standardization	180
7.3.1	Reference Models and Interfaces	181
7.3.2	Industry Organization and Standardization	182
7.3.3	The Standardization Process	183
7.3.4	Who Controls and Who Enforces Standards?	185
7.3.5	Why Open Standards?	186
7.3.6	Standardization Has Downsides Too	188
7.4	*Open Issues	188
7.4.1	Industry Organization	189
7.4.2	The Best Standardization Processes	189
Chapter 8	Economics and Policy	193
8.1	Obstacles to Change	193
8.1.1	Network Effects	193
*Economic model of network effects		195
Standardization and network effects		197
8.1.2	Lock-in	199
Supplier and Industry Lock-in		200
Open Systems and Lock-in		201
8.1.3	*Path-Dependent Effects	202
8.2	Challenges for Suppliers	203
8.2.1	*Technical Properties of Information	203
8.2.2	Economic Properties of Information	205
8.2.3	Software as a Special Case	207
8.2.4	Equipment	207
8.2.5	*Protecting Investments with Intellectual Property	208
8.2.6	Selling Content and Software	208
Value of content		209

Value of software	210
*Price Discrimination and Versioning	211
8.3 *Government Roles	214
8.3.1 Protecting Intellectual Property	214
Copyrights	214
Copyrighting software	215
Patents	216
Software patents	217
8.3.2 Support of Research.....	218
Industrial Research	219
Government-Sponsored Research	219
8.3.3 Government Policies and Laws	220
Privacy	221
Content Regulation	221
Law enforcement and national security	222
Antitrust law	222
Telecommunications Regulation	223
8.4 *Open Issues	224
8.4.1 Sovereignty and the Global Internet	224
8.4.2 The Language of the Internet.....	225
8.4.3 A New Partnership.....	225

Part IV: Making It Happen

Chapter 9 Applications and the Organization	231
9.1 Organizational Rationale for Networked Computing	231
9.1.1 Scalability	232
9.1.2 Administration	232
9.2 Acquisition Options	234
9.2.1 Make vs. Buy	235
9.2.2 Purchase Terms and Conditions	235
9.3 Application Lifecycle	235
9.3.1 Lifecycle Model of Development	236
Conceptualization	236
Analysis	237
Architecture Design	238
Development Evolution	238
Testing and Evaluation	238
Deployment	239
Operations, Maintenance and Upgrade	239
9.3.2 Alternative Development Methodologies	239
9.4 Examples	240

9.4.1 Customer Care	240
9.4.2 On-line Bookseller	241
9.4.3 Stock Trading	241
9.4.4 Floral Delivery	242
9.4.5 Observations	242
9.5 *Open Issues	243
Chapter 10 Architecting an Application	245
10.1 Major Considerations	245
10.1.1 Decomposition vs. Assembly	245
Decomposition: Object-oriented Programming	247
Assembly: Software Components	248
10.1.2 Software Reuse	248
10.1.3 Location of Data and Processing	250
10.1.4 Host Partitioning	251
10.2 Tightly Coupled Data and Processing	252
10.2.1 Object-oriented Programming	252
Object as the Focus of Modularity	253
Objects in the Physical World	253
Relation of Software and Real-World Objects	254
Class and Object Implementation	256
Visual Architecture Modeling	257
Dealing with Legacy Systems	257
10.2.2 Software Components and Frameworks	258
What is a Software Component?	259
Designing Components	261
Scripting and Visual Assembly	261
Frameworks	262
Example: Compound Document	262
10.3 Loosely Coupled Data and Processing	263
10.3.1 Extracting Information from a Database	265
10.4 Examples	265
10.4.1 Online Bookseller	265
10.4.2 Stock Trading System	265
Chapter 11 Programming an Application	271
11.1 Algorithms, Protocols, and Policies	271
11.1.1 Three Simple Protocols	273
11.1.2 *Application Protocol Example	274
11.2 *Programming Languages	276
11.2.1 Imperative vs Declarative Languages	277

11.2.2 Assembly Language.....	278
11.2.3 Object-oriented Programming Language.....	278
11.3 Program Execution	278
11.4 *More Advanced Concepts in OOP	279
11.4.1 Two Types of Relationships: “Is A” and “Part Of”	279
Hierarchy in “Is A” Relationships: Inheritance	280
11.4.2 State	282
11.4.3 Locating Objects: References	282
Hierarchal Decomposition of Objects	283
11.4.4 Polymorphism.....	284
11.4.5 Object Interfaces	285
11.4.6 Ways Objects Can Interact	286
Polling	286
Events	286
11.4.7 Objects and Relational Tables	287
11.4.8 How OOP Contains Complexity.....	289
11.5 Examples	290
11.5.1 Address Book Example	290
11.5.2 Online Bookseller	291
11.5.3 Stock Trading System.....	291
11.6 *Other Programming Issues	291

Part V: Infrastructure

Chapter 12 Communications Support for Applications	299
12.1 Communication Services	299
12.1.1 Message Service	300
Queueing and Multiplexing	301
12.1.2 Message with Reply Service.....	302
Remote Method Invocation	303
12.1.3 Timing and Concurrency	304
12.1.4 The Conversation.....	306
Multimedia Transport	307
12.1.5 The Broadcast	310
12.2 Internet Communication Services	310
12.2.1 Internet Protocol (IP)	311
12.2.2 User Datagram Protocol (UDP).....	312
12.2.3 Transmission Control Protocol (TCP).....	312
12.2.4 Internet Inter-ORB Protocol (IIOP).....	313
12.2.5 Multimedia Sessions	314
12.3 Examples	315

12.3.1 Online Bookstore	315
12.3.2 Stock Trading System.....	315
Chapter 13 Security	319
13.1 Availability	319
13.1.1 Intrinsic Reliability	320
Software Bugs	320
Configuration and Operation	321
Emergent Behavior	321
Cost of Availability	321
13.1.2 Security: Countering Deliberate Threats	323
13.2 Postal System Analogy	325
13.3 Some Threats	326
13.4 Security Measures	329
13.4.1 Confidentiality Protocols	330
Symmetric vs. Asymmetric Encryption	331
Encryption algorithms	332
13.4.2 Authentication.....	334
Biometrics	335
Authentication by Secret	335
Digital Certificates and Certificate Authorities	336
13.4.3 Digital Signatures	338
13.4.4 Combined Protocols.....	340
13.4.5 Security Policies	341
Access Control	342
Firewalls	343
13.5 *Security Tools	344
13.5.1 Encryption Algorithms	344
Idealized Block Substitution Table	345
Symmetric Encryption: Data Encryption Standard	346
Asymmetric Encryption: RSA	347
13.5.2 Digital Envelope	348
13.5.3 Authentication in Closed Administrative Domains	350
Passwords	350
Authentication Servers	351
13.6 Examples	353
13.6.1 Online Bookseller	353
13.6.2 Stock Trading System.....	353
13.7 Open Issues	353
13.7.1 Increasing Vulnerability?.....	353
13.7.2 National Security and Law Enforcement Needs.....	353
13.7.3 Theft and Piracy of Software and Information	354

Chapter 14	Electronic Payments	363
14.1	Objectives	363
14.2	Types of Payments	364
14.3	Secure Electronic Transactions (SET)	364
14.3.1	SET Chain of Trust	365
14.3.2	SET Order-Authorization Protocol	365
14.4	Digital Cash	366
14.4.1	Anonymous Digital Cash	370
14.5	Open Issues	371
Chapter 15	Data and Resource Management	379
15.1	Database Management	379
	The Relational Model for Structured Data	380
	*Extending the DBMS	383
15.2	Document Management: XML	384
15.3	Transaction Processing	386
15.3.1	Example of the Challenges: Travel Reservations	387
15.3.2	Role of Transaction Processing	387
15.3.3	What's in a Transaction	388
15.3.4	Transaction Processing Architecture	390
15.3.5	*Transaction protocols	392
15.3.6	Examples	392
	ATM Networks	393
	Online Bookseller	393
	Stock Trading System	393
15.4	Examples	394
15.4.1	Online Bookseller	394
15.4.2	Stock Trading System	394
15.4.3	Supply Webs	394
15.5	Open Issues	394
Chapter 16	Middleware	401
16.1	Messaging and Queueing Middleware	402
16.2	Mobile Code And Mobile Objects	403
16.2.1	Advantages of Mobile Code	404
	Interactivity and Scalability	404
	Interoperability	406
16.2.2	Mobile Agents	407
16.2.3	Mobile Code and Agent Middleware	408

16.2.4 *Java mobile code.....	408
16.3 Distributed Object Management	411
16.3.1 One DOM Standard: CORBA	412
16.3.2 Changing data representations	412
16.3.3 Interface Discovery	414
16.3.4 Services	415
16.3.5 Interoperability Among ORB's: IIOP.....	416
16.3.6 Horizontal and Vertical Facilities	416
16.4 Examples	416
16.4.1 Online Bookseller	416
16.4.2 Stock Trading System.....	417
16.4.3 Supply Webs	417
16.5 Open Issues	417
16.5.1 Wither Inter-Organizational Computing?	417
16.5.2 Middleware Service Providers?	417
16.5.3 Middleware Spanning Layer?	417

Part IV: Performance

Chapter 17 Concurrency and Scalability	422
17.1 Performance and Quality Metrics	422
17.1.1 Performance	422
17.1.2 Quality	423
17.1.3 Factors in Performance and Quality	424
17.2 The Role of Concurrency	425
17.2.1 Concurrency with Multiple Hosts.....	426
17.2.2 Concurrency in a Single Host	427
17.2.3 Resource Conflicts and Transactions.....	428
17.2.4 *Concurrency for Objects	431
17.2.5 *Concurrency for Performance.....	433
Parallelism	433
Pipelining	434
17.3 Scalability	436
17.3.1 Blocking.....	437
17.3.2 Duplicated Work.....	437
17.3.3 Faulty Load Balancing.....	437
17.3.4 Congestion	438
Congestion in Processing	439
Congestion on Communication Links	441
Congestion in Storage	441
17.3.5 Application Architecture Role in Scalability.....	442

Designing High Performance Systems	442
17.3.6 Mobile Code and Scalability.....	443
17.4 Examples	444
17.4.1 Online Bookseller	444
17.4.2 Stock Trading System.....	444
17.5 Operating Systems	444
17.5.1 Processes	444
17.5.2 *Processes and Objects	445
17.5.3 *Other Operating System Functions.....	446
17.5.4 *Inter-Process Communication.....	448
17.6 *Hardware Performance Factors	449
17.6.1 Electronics and Photonics	450
17.6.2 Host Architecture	450
17.7 Open Issues	452
Chapter 18 Networks	457
18.1 Functions of a Network	457
18.1.1 Sharing Communication Links: Statistical Multiplexing	457
18.1.2 Packet Forwarding and Routing	459
18.1.3 Name Services	460
18.1.4 Flow Control	463
18.1.5 Network Congestion	463
Congestion Instability	464
Implementation of Congestion Control	467
18.2 Quality of Service (QoS)	468
18.2.1 The Internet Transport Protocols and QoS	469
18.2.2 Integrated Services.....	470
18.2.3 Pricing of Network Services	473
18.3 *Network Protocol Architecture	476
18.3.1 Packet Encapsulation	476
18.3.2 Packet Fragmentation and Reassembly	477
18.3.3 Protocol Layering	477
18.4 *Internet Protocols	479
18.4.1 Internet Protocols Architecture	479
18.4.2 Packet Header Formats	482
18.4.3 IP Multicast.....	484
18.4.4 Domain Name System	484
18.4.5 Reliable and Ordered Delivery	486
18.4.6 Flow Control	488
18.4.7 Integrated Services.....	489

18.5 Network Security	490
18.5.1 Secure and Insecure Authentication	490
18.5.2 Security Flaws in Public Servers	491
18.5.3 Firewalls and Packet Filtering	491
18.5.4 Where to Use Encryption and Authentication	493
18.6 Open Issues	494
18.6.1 The Future of the Internet	494
18.6.2 Multiple Networks	494
18.6.3 Making Money on Internet Content.....	494
Chapter 19 Communications	501
19.1 Communications Service Providers	501
19.1.1 Trends in Communications	502
19.1.2 Data Communications.....	503
19.1.3 Communications Regulation.....	503
19.2 Current Developments In Internet Access	505
19.2.1 Broadband Network Access for Residences.....	505
19.2.2 Nomadic and Untethered Internet Access	506
19.2.3 IP Telephony	509
19.2.4 Integrated IP Networks	510
19.3 Communication Links	510
19.3.1 Impact of a Communication Link on Message Latency	512
19.3.2 Impact of Message Latency on Application Performance.....	515
19.3.3 Why Broadband?	515
19.3.4 Mitigating Communications Bottlenecks	516
Data caching	516
Data compression	518
Mobile code	521
19.4 *How Digital Communication Works	522
19.4.1 What is Bandwidth?.....	522
19.4.2 Sending Bits by Modulating Pulses	523
19.4.3 Spectral Efficiency.....	525
19.4.4 The Regenerative Effect	526
19.5 *Multiple Access	526
19.6 Open Issues	528
19.6.1 Is Communications Regulation Needed?.....	529
19.6.2 Regulation of the Internet	529
Appendix A Economics Models	535
Appendix B Interface Definition Language	538

Appendix C	System Programming Language	545
Appendix D	Reliability and Queueing	549
Appendix E	RSA Asymmetric Encryption	553
Glossary	556
References	572
