

Participant #1
Notes by KB & CK

Scenario 1:

Process:

- 1) Chose Artifact Class > Vessels and clicked “Go” button
- 2) Clicked the text only
- 3) Clicked one of the vessels from the thumbnail views of results.
- 4) Browsed the some of the links that available in the prototype

Comments:

Text only view option

- It is useful to go thru the artifacts and easy to recognize the catalog #s.

Thumbnails view option

- Good for looking at the shape of artifacts

Question of “Remove” function on the Artifact Detail Page—should it remove all or just the end leaf node?

After checking the checkbox it would be nice to not have to scroll up to click Go

Also doesn’t like to scroll back to the top to look at the artifacts that are displayed.

Scenario 2:

Process:

- 1) Chose Location > Chincha Valley > Site E > Grave 13.
- 2) Viewed the results.

Comments:

- Would like to access both PDF & full-text digital about the artifact

Scenario 3:

Process:

- 1) Chose Artifact Type > Vessels and clicked “Go” button
- 2) Clicked the text only view option
- 3) Clicked the Print Results.

Overall Interface Comments:

- Suggestion for the location of Catalog Cards: 1) in the artifact detail page, or 2) in the search results
- Add unpublished manuscript to the artifact type?
- Use the ‘Culture’ instead of time period.
- Somewhere close to the title, refer the other Uhle collections, as “other collections”
- Suggestion for the horizontal navigation menu: put all major categories across bottom
