

*Planning Academic and Research Library Buildings*. 3rd ed. by P. D. Leighton & D. C. Weber.

Chicago: ALA). The "Bible" on buildings, by Keyes Metcalf,. Grad Reserve Z679.M491 2000

1. Planning an academic or research library building is an important and complex undertaking. 2. Building design should be done well because it can be altered only with considerable difficulty and expense. 3. A building is a costly undertaking and the raising funds may be very difficult, esp for large building. 4. The need for library space confronts every academic institution sooner or later, often frequently. 5. The planning process is often the responsibility of people who have little or no experience in this field. In second ed: Pp 7: PERT; 104 Organization diagram. 259-261: Types of costs; 309: project development process. 372-9 Human dimensions. 545 Spatial relationships. Glossary 575-96. See App B 555-66.

*American Libraries* has special issues on new and renovated library buildings, e.g. April 2000.
