## **1. PROJECT IDEA UPDATE**

Now that you have had a chance to present your project to the class and receive feedback in class and in email, we would like you to integrate that feedback and rethink your project idea and scope. In reassessing, rescoping, and redesigning your project, please keep in mind the questions from the last assignment, all the feedback you have received, and *our expectation that you will design, build, test, iterate, and present a working digital media application prototype by the end of the course.* Working with you team members:

- Create a new brief 1 paragraph project description of your revised project idea
- Point out what you have changed in your project as a set of additional bullet points
