

# Emotional Lightcube

*TUI Final Project Proposal, by Eun Kyoung Choe & Matt Chew Spence*

*An interactive photocube with ambient display that shows the current moods of friends and loved ones. The ambient display can show either the mood of a single person or a combined view showing the mood of all the people on the cube.*

## ***output***

Cube is ambient display that glows a given color based on the mood of the person on top of the cube

## ***YOUR emotion***

Rotate the cube to display mood of a particular person; one side of cube displays an aggregate view of the combined moods of everybody

## ***MY emotion***

Move the cube over emoticon on mood pad to notify contacts of your current mood
