Project 1

Memex

As We May Think

"The human mind does not work that way. It operates by association. With one item in its grasp, it snaps instantly to the next that is suggested by the association of thoughts, in accordance with some intricate web of trails carried by the cells of the brain.

It affords an immediate step, however, to associative indexing, the basic idea of which is a provision whereby any item may be caused at will to select immediately and automatically another. **This is the essential feature of the memex. The process of tying two items together is the important thing.**"
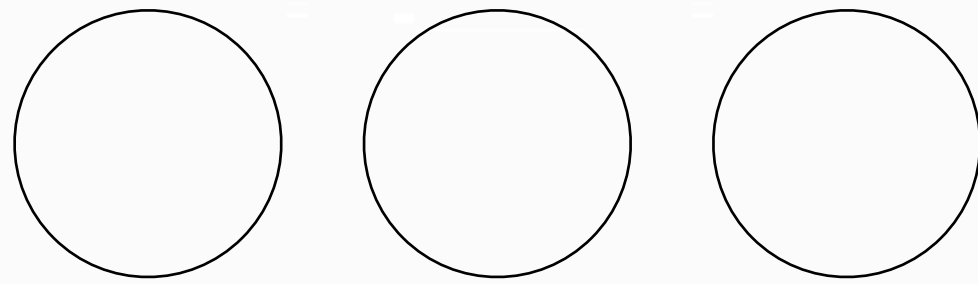

Trailmaker

"... he builds a trail of his interest through the maze of materials available to him."

Let's Put Them Together

Lab

https://github.com/raymonst/iolab-lecture5

Your task is to build a basic portfolio page.

Follow the instructions in index.html, style.css, and script.js.

Work on your own or in pairs.

Work locally (you don't need to check things back into the repository).
